

# USER MANUAL

3 in 1 Wireless Charger  
EZ31

RoHS FC CE  

Made in China

# Preface

Dear users, thank you for purchasing our products. In order to have a further understand of the product, please read this manual carefully before use. Wish you a happy experience!

## Product Details

1. Wireless Charging Area1 (Phone)
2. Wireless Charging Area2 (TWS)
3. Wireless Charging Area3 (iWatch)

4. Indicator Light
5. Type-C USB

## Specification

Input: DC 9V=2A/12V=1.5A  
Output 1: 15W Max (Phone)  
Output 2: 5W Max (TWS)

Output 3: 3.5W Max (iWatch)  
Size: 115\*70\*124 (mm)  
Phone Charging Distance:  $\leq 10$ mm

# How it works

## 1.Connect Instruction

- Connecting the power supply according to the diagram.
- Put device on wireless charging area.
- When the Indicator light is always on, it indicates that it is charging the device.

## 2.Power Indicator light Instruction

- When connecting the power, the green light and sky blue light flash once orderly, then die out.
- When the device is put (Phone) in the charging area 1, the charger turns into the charging status, the green indicator light is always on.
- When the device is put (TWS) earphone in the charging area 2, the charger turns into the charging status, the sky blue indicator light is always on.
- When two devices are put in the wireless charging area 1 and 2 at the same time, the sky blue indicator light is always on.

e. When the indicator light is flashing, please check the charging position for metal foreign objects. If the light still flashes after you remove the foreign objects, please contact the after-sales service.

## Product Details

This part is a magnetic charging area with a built-in magnet, which can easily adsorb phones that support magnetic charging (Example: Apple 12 and above series).

It can be rotated and fine-tuned, which is convenient for users to adjust the angle of use.

## Notice

a. Please use PD20W or QC3.0 compatible power adapter to achieve fast charge.

b. It is a normal phenomenon of fever during the charging process. If your phone is heating up badly and the charging device has not increased in power for a long time, please adjust the position of the charging device. Ensure that the center of the charging device and the center of the charging area of the wireless charger are aligned before charging.

## Product and Safety infor

1. Do not squeeze or collide.
2. Do not disassemble it or put it into fire or water to avoid short circuit and leakage.
3. Do not use the wireless charger under severe high temperature, humidity or corrosive environment to avoid damage to the circuit and leakage.
4. Do not place it too close to the magnetic card with magnetic stripe or chip (ID card, bank card, etc.) , which to avoid the failure of magnetic card.
5. Please keep away from the implanted medical equipment (pacemaker, implantable ear, etc.) to avoid the magnetic card failure. The distance between equipment and wireless chargers should be at least 20cm to avoid potential interference with medical devices.
6. Children should be supervised to ensure that they do not refer the wireless charger as a toy to avoid unnecessary accidents.
7. Keep the charger and receiver away from water and other liquids.
8. If you need to clean the charger, please make sure to disconnect it from the power supply.
9. Please use it at the ambient temperature of 0-45°C.
10. This product is suitable for phones, earphones, and iWatch2-8 that support Qi protocol.

## Package Content

1x Wireless Charger  
1x Charging Cable

1x User Manual  
1x PD 20W Adapter

## FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- a. Reorient or relocate the receiving antenna.
- b. Increase the separation between the equipment and receiver.
- c. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- d. Consult the dealer or an experienced radio/TV technician for help.

## FCC RF exposure statement:

The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
