●Bluetooth(Tools/Bluetooth)
【Bluetooth Usage Tips】
⚠ Before connecting to our device, please make sure to disconnect your Bluetooth headphones, speakers, and other devices. Otherwise, Bluetooth won't work properly. Typically, Bluetooth devices automatically prioritize reconnecting to previously connected devices, especially if the Bluetooth on your phone is left on.

1.Select "Tools", press " Ⅰ◀◀▶▶Ⅰ " key to select "Bluetooth", press "   " key to confirm the entry of Bluetooth.
2.After entering the bluetooth, bluetooth open automatically. The bluetooth menu list: bluetooth switch control, search for device, device list, BT upgrade.
3.Left Right Key to selected search device to search nearby bluetooth devices, selet the device in the device list, select device matching connection, after the success of the connection , the native music, radio and video voice is pushed to the bluetooth device.
4.When do not need bluetooth function, enter the bluetooth control switch to close bluetooth.

★★★★★note:
Bluetooth only support bluetooth speakers, bluetooth headsets, does not support connect with mobile phone.

-20-

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
FCC Radiation Exposure statement
The device has been evaluatec to meel general RF exposure requirement. The device can be used in porlable exposure condition without restriction.
