When Bluetooth mode turned on, and the LED blue light will blink. Once paired/connected, the blue light will be always on.

Tips

Before starting
peel off the protect film of the stick pad
which on the bottom of speaker.
then place the speaker onto the
surface of any hollow subjects.

Using nail / pin to assist
lanyard through the hole

*Any querles,please contact us:hello@bocoice.com

Note:

- 1.After several trial, sticky pad will be not sticky enough, you can clean the dust with wet cloth, then it can back to well sticky. Double side tape will be useful also.
- 2.If you play music at maximum volume, the speaker itself will get hot, which is normal. When the volume is lowered little, the speaker will return to normal temperature.

FCC Warning:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1)This device may not cause harmful interference, and (2)this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio / TV technician for help.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
Radiation Exposure Statement
The device has been evaluated to meet general RF exposure requirement in portable exposure condition without restriction.
