

# LotusLantern APP Manual

## 1. Software Overview

### 1.1 Overview

LotusLantern is a mobile APP to control LED strip by both IOS and Android phones.

The traditional control ways like infrared, 433MHz, 2.4GHz and others old wired ways will be replaced by mobile phone control way with convenient, powerful and scalable features.

Through this mobile APP , you can not only control the color, brightness and color temperature of the LED strips but also set up all kinds of fancy flash mode ; Also this APP can change the light of the LED strip according to the rhythm of the music, This APP can set and control several LED strips through Bluetooth and the operation is very simple, easy to learn and easy to use.

### 1.2 Features

- Adjust color LED strips with 60,000 colors to change color and brightness and adjust monochrome LED strips to change brightness and color temperature
- Play music or turn on a sound playback device, you can let the light change the color and brightness with the rhythm of music, the music rhythm beautiful
- Inside multiple setting mode for color change and control LED strips without mobile
- Long distance control with omni-directional antenna, and many-to-many group control mode
- Once the connection is successful, connect automatically next time

### 1.3 Performance

LotusLantern APP is easy for use as well as great compatible with all kinds of smart phones; After the actual test of hundreds of mobile phones verification, the compatibility is above 95% of mobile phones in the market. APP is small and convenient, it consumes less system resources, so the requirements of the mobile configuration are low. Control delay is small, the operation feels good, light control is smooth with people's visual sense.

## 2. Operating Environment

This APP program requires phones of system above Android 4.3 and iOS 8.0. Mobile phone configuration is not limited.

## 3. Instructions

Switch phone microphone and external microphone

4-style rhythm

Change the sensitivity of MIC to match the sound

(10) Switch to the schedule interface:

The screenshot shows a mobile application interface for scheduling. It is divided into two main sections: 'Schedule On' and 'Schedule Off'. Each section has a toggle switch, a 'Time' field, and a 'Repeat' row of seven circular buttons. The 'Repeat' buttons are currently unselected. Callout boxes with arrows point to these elements: 'Set the time of Light-On' points to the 'Time' field of the 'Schedule On' section; 'Set the time of Light-Off' points to the 'Time' field of the 'Schedule Off' section; 'Enable or disable the Light-On function' points to the 'Schedule On' toggle; 'Repeat setting No selection for once Light-On' points to the 'Repeat' buttons of the 'Schedule On' section; 'Enable or disable the Light-Off function' points to the 'Schedule Off' toggle; and 'Repeat setting No selection for once Light-Off' points to the 'Repeat' buttons of the 'Schedule Off' section. The bottom navigation bar includes icons for 'Style', 'Music', 'Online', 'Mic', and 'Schedule'.

(11) Switch to the modify pin sequence interface:

The screenshot shows the 'Modify Pin Sequence' interface. At the top, there is a 3D model of a pin header. Below it is a grid of nine circular buttons arranged in three rows and three columns. The top row is labeled 'V+' on the left and 'W' on the right. The middle row contains buttons labeled 'R', 'G', and 'B'. The bottom row contains three unlabeled buttons. A red box highlights the 'R', 'G', and 'B' buttons. Callout boxes with arrows point to the top-right button of the grid and the 'R' button. The top-right callout says 'Click to save the new assignment'. The 'R' callout says 'Change the real color of this line'.

## FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

FCC Radiation Exposure Statement: This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, Human proximity to the antenna shall not be less than 20cm during normal operation.
