6 “One-Click” Instructions

- 1.Prepare before use
- First scan the QR code or the APP store to download the app

Android QR Code Download

IOS Code Download

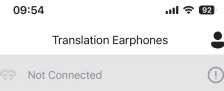

Before using the translation headset, please follow these steps:

- Scan the QR code of the manual/packaging box to download and install.
- In all major mobile APP store, search for "one-click" app.
- Make sure your headphones are fully charged before use.

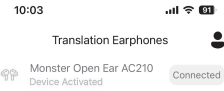

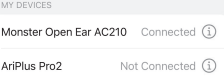

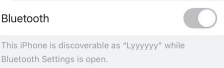

- 2.Use the procedure
- After opening the "One-Click" APP, click the translation headset to enter the translation headset function interface.

Click "Disconnect" in the upper right corner of the "Translate Headset" interface, find the Bluetooth headset name corresponding to your headset in the Bluetooth Settings of the mobile phone system and connect it, and return to the "Translate Headset" interface after the connection is successful

Let language have no borders and make communication easier

Let language have no borders and make communication easier

According to different usage scenarios, the following 5 translation modes are provided. Click the "Function name" button to enter the corresponding translation mode, and perform translation operations according to the prompts in different translation modes:

Touch Mode

- 1. Touch Mode
- Two people wear a earphone, click or double-click the earphones to translate in real time, suitable for acquaintances who are willing to wear earphones.

The side that touches the headset first hears a "drop" sound, can speak continuously, and both sides can hear simultaneous interpretation. When the other person wants to talk, touch their headphones and hear a "drop" to start talking.

Speaker Mode

- 1. Speaker Mode
- One person wears earphones and one person talks the mobile phone, suitable for strangers who are inconvenient to wear earphones

You tap/double tap the headset (or tap the bottom half screen of the phone) to start talking, and then the phone will play the translated content. Tap the top half screen of the phone, indicating that the other person is talking into the headset, and you will hear the translated content from the headset.

Free talk Mode

- 1. Free talk Mode
- Both of them wear a earphone, translation in real time, release their hands, and communicate freely

Two people, each wearing a headset, tap/double tap the headset (or tap on the screen to start recognition), real-time translation, free hands, free communication.

Audio and video call Mode

- 1. Audio and video call mode
- Just turn on your mobile phone and enter the audio and video translation interface, and click the "Function name" button.

Just open the mobile phone, enter the audio and video function, share the room number link to the other party, you can make voice calls, video calls translation, real-time translation, both speaking and translating. Even if you do not speak a foreign language, you can easily communicate and translate real-time calls with foreigners.

Audio and video call Mode

- 1. Offline Mode
- Translation can also be done without the network, supporting real-time offline translation in Chinese, English, Japanese, Korean, Russian, German, French, and Spanish

Download the required offline language in advance before use, and can also be translated offline without network on the plane, supporting Chinese (simplified and traditional), English, Japanese, Korean, Thai, Russian, German, French, Spanish, real-time offline translation.

- 3. Set the system
- In the APP function interface, tap the icon in the upper right corner to enter the "MY" interface, tap "Settings" to enter the basic Settings interface.
- System language (Android adaptive mobile phone system language):
- Click the system language to set the system language of the APP. After clicking the required system language, the entire APP interface will be changed into the required language.

4.Common Problems

When you receive our translation headset, please fully charge it before use.

Make sure that the Bluetooth connection is successful, open any music APP, check whether there is sound in the left and right ears.

Bluetooth connection: Put the translation headset into the charging bay, then take it out and put it in again, let the headset and the charging bay sense, find the translation headset lights up, then take it out and wear it on the ear, wear both headphones, and then search for Bluetooth on the mobile phone.

Product warranty card

Warranty terms

- 1. To purchase this product, please fill in this card carefully and read the following warranty terms carefully to ensure that the product is guaranteed
- 1) Users should carefully keep this card when purchasing products, and ask the seller to seal for confirmation.
- 2) This warranty card shall be provided at the time of warranty.
- 3) The information added in this warranty card is true, otherwise it will be invalid.
- 4) The product warranty period is one year. During the warranty period, if the product fails due to poor quality or manufacturing problems of their original components, the company will provide free maintenance and parts replacement.
- 2. The product is damaged and cannot be used normally due to the following reasons, which is not within the scope of warranty
- 1) Damage caused by use and installation not in accordance with the Instructions.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
