Installation Diagram

NOTE:

Please DO NOT plug into outlet for a long time when the strip light is rolled up, test the light when it is unfolded.

Installation

a. Open the package and unfold the strip light. Please check whether the strip light appearance and all parts are in good condition. Then power the strip light to test whether it could light normally.

b. Clean the surface of the object where the strip needs to be installed and keep it dry. Any dust and liquid will affect the stickiness of the 3M adhesive.

c. Tear off the adhesive tape, paste the strip on the correct place at once time. (Note: Do not move the strip light to other places after it is attached.)

d. Press the strip firmly from the beginning to the end to remove the air from the strip and the surface of the object.

e. The installation is over, please connect the power with strip light. You can switch the light on/off and choose the color effect by using the IR remote.

WIFI CONTROL, APP Installation

1. Search 'Tuya Smart' in 'Google PlayStore' for Android/ 'APP Store' for IOS or from the browser, then install it.

Connection Instructions

1. Click '+' or 'Add Device', then choose 'Lighting' and 'Strip Lights'

2. Confirm whether the strip light is blinking fast firstly. 1) If it is blinking fast, please skip the reset step, then click 'Confirm indicator rapidly blink'. Enter Wi-Fi password and confirm, then wait for the connection to complete. 2) If it is not blinking fast, please follow the reset step by step. Click 'Resetting Devices' to finish the setting. Then click 'Confirm indicator rapidly blink'. Enter Wi-Fi password and confirm, then wait for the connection to complete.

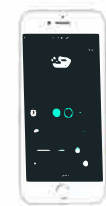

3. After connecting, you can rename this device, such as 'Bedroom', 'TV Backlight' ... which is convenient to manage later.

4. There are four different modules at the bottom of the page.

1) **RGB Color:** lamp On/Off; change various colors, and increase/decrease their brightness with adjusting the first line. (NOTE: If you need white color, just adjust the second line to the 0%)

2) **DIY Function:** There are 8 different scenes. Click 'Edit' to DIY your own favorite colors. You can reset the picture, name and color. (NOTE: there are three different colour modes 'Static' 'Flash' and 'Breath' for the 'Scene Colour'. Just one color can be set for 'Static' mode, while the other two modes can set eight colors.) When 'Reset' is completed, click 'Submit' to keep this DIY color.

3) **Music Sync:** You can open the music player on your phone, then the strip light will blink and change color with the music rhythm or people talking. (NOTE: The page must stay in the music module, otherwise they will not sync.)

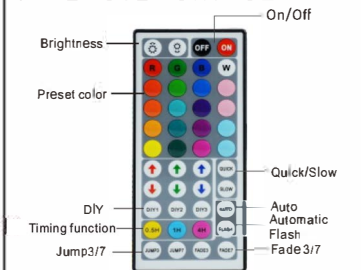

4) **Timing Function:** You can set when the strip light is turned on and off every weekday, every weekend or every day. And you can also set how long the strip light will turn off.

5. Our strip light also can be controlled by third-party app, such as Alexa, Google Assistant... And the existing device can be removed and connect other devices.

ATTENTION

1. Please DO NOT plug into outlet for a long time when the strip light is rolled up. The strip light must be unfolded when you test it.

2. The strip light must be installed on smooth, clean and dry surface. When it is installed, do not plug into the outlet, and the bend should be avoided just in the position of the LED components, so as not to damage the product and affect its service life.

3. The strip light should not be collided or crushed.

4. The strip light can be cut along the cutting mark. Please make sure the power off firstly. (NOTE: NO repair tools are provided in the package.)

5. Do not connect controller of any other brand to SHOPLD's adapter.

6. Please pay attention to anti-static during the installation and use of the product. Do not use sharp objects to touch the product, and avoid damage to the product.

7. Please make sure there is no hidden nail or metal conductive object in the contact part between the light and the wall. If there is, remove or avoid the conductive object in advance to prevent unnecessary short-circuit of the strip light.

8. Children must use this strip light under the supervision of a guardian.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: -Reorient or relocate the receiving antenna. -Increase the separation between the equipment and receiver. -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. -Consult the dealer or an experienced radio/TV technician for help.
