

FCC Statement  
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:  
•Reorient or relocate the receiving antenna.  
•Increase the separation between the equipment and receiver.  
•Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.  
•Consult the dealer or an experienced radio/TV technician for help.  
Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.  
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

RF Exposure Information  
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

### I. Smart Light Connection

1. Before installing the smart light, make sure you have a router which can access to the internet successfully, the WIFI router must switch to 2.4Ghz mode. Please turn on WIFI and Bluetooth on your phone or tablet.  
2. There are three methods to connect, EZ mode(Default), AP mode and Bluetooth. It is usually successful to follow the EZ mode with the help of enable device's Bluetooth function.  
3. If not, then try the AP mode.

**Default mode: Wifi Quick pairing with help of Bluetooth**

#### Step1: Download the smart life app?

Android devices scan the QR code and download smart life app.IOS search 'smart life' in app store.

Install APP and Register an account.

#### Step2: How to make the light blink rapidly?

① Power on the light(>10s)  
② Power off(>2s)->Turn on(<1s)->off(>2s)->on(<1s)->off(>2s)->on (Wait for 5S)  
③ Then the light will rapidly flash (On and off twice per second)  
④ If not, please try again, go on step 2 as long as the light is quickly flashing.

#### Step3: How to add the smart light in the app?

① App installed devices connect to Wi-Fi and enable the bluetooth and location permissions.

- 01 -

② When the light is in pairing status (quick flashing), click "+" on the top right corner of smart life app. tap in order Add Manually->Lighting->Light Source (BLE+Wi-Fi).  
③ Make sure the light is quick flashing. Choose the local WIFI and enter WIFI password, click 'Next', then add the light accordingly.  
④ You can rename the device as you want and control it on the app.

#### AP mode:

Set App to pairing status, please choose 'AP mode' on the top right corner.

Follow the prompts:

① Power on light(>10s)  
② Power off(>2s)->Turn on(<1s)->off(>2s)->on(<1s)->off(>2s)->on, after the flash is quickly flashing(Light on and off twice per second), the continue, power off(>2s)->Turn on(<1s)->off(>2s)->on(<1s)->off(>2s)->on (Wait for 5S)  
③ Then the light is slowly flashing (Light on and off once per second).

#### Bluetooth connection:

① Make sure your mobile phone/tablet has connected to a 2.4 Ghz WIFI router and the device's bluetooth is enabled.

② Make sure the light is flickering.

③ When you open the 'Smart Life' app, the 'adding device window will pop up', add the device accordingly.

④ If the device adding window does not pop up, click the '+'

- 02 -

on the top right corner of the App to add the device.

### II. FAQs

**Q: How to investigate problems if i can not connect the smart light?**

A: Please check if the light is powered on properly.  
B: Check if the phone is connected to WIFI and if your light is connected to the same WIFI as your phone.  
C: Ensure the WIFI can access to internet and only 2.4g WIFI is supported.  
D: Check if the light is rapidly flashing(on 0.5s and off 0.5s) Before you start step3.  
E: Make sure the WIFI password enter in App is correct when adding device.  
F: Please do not use light outside WIFI device and metal container where can block WIFI signals.

#### Q:How to reset the light?

A: If the light doesn't have installed. Turn on(<1s)->off(>2s)->on(<1s)->off(>2s)->on(Wait for 5S) And then the light will rapidly flash(2 times per second).  
B: If the light have installed. In the page 'device details' click 'remove device' after 5 seconds the light will flash.
