WARNING - TO REDUCE THE RISK OF FIRE:

- 1) Always plug the heater directly into a wall outlet/receptacle. Never use with an extension cord or re-locatable power tap (outlet / power strip).
- 2) Check your heater cord and plug connections. A loose fitting outlet can cause the plug to overheat or cause fire. Be sure plug fits tight in the outlet. Check frequently during use to make sure plug and outlet are not hot. If so, discontinue using heater and have outlet replaced by a qualified electrician.
- 3) Always unplug heater when not in use.
- 4) Do not operate heater with a damaged cord or plug or after the heater malfunctions, has been dropped or damaged in any manner. Discard heater or return to an authorized service facility for examination and/or repair.
- 5) Do not run cord under carpeting. Do not cover cord with throw rugs, runners, or similar coverings. Do not route cord under furniture or appliances. Arrange cord away from traffic area and where it will not be tripped over.

DO NOT REMOVE THIS TAG!
