

Recorder Product Manual

First of all, thank you very much for using our company's series of products. It is our honor to serve you! In order to ensure that you use the company's products correctly, please read this manual carefully. The manual adopts a combination of pictures and texts, and the illustrations in conjunction with the text explain the operation of the product in detail and intuitively. Due to the different production dates and batches of the product, the description may be different from the actual product. Please refer to the actual product.

Finally, thank you again for your patronage and support, and I hope you will give some valuable feedback during the use process. Because of these opinions, we can continue to improve the product. Because we all call for safety first, life is priceless! I also hope that every driver will abide by the traffic rules, go out happily, and return home safely!

1. Appearance and button function description (pictures are for reference only, please refer to the actual object)

- ① Paste 3M glue ② Power button/photograph button ③ Camera lens ④ Speaker
⑤ USB port ⑥ TF card slot display window ⑦ Video indicator

1. Button description

Short press: lock the video, short press to format the memory card for the first time when using a new card.

Long press: power on or power off.

2. Voice instruction description

Say "I want to take a photo": the photo is taken successfully Say "video lock": the video has been locked

Say "Turn recording off": OK Say "Turn recording on": OK

2. Download the mobile APP

1. When using the recorder for the first time, please use your mobile phone to scan the QR code to download the "Viidure" APP software.

2. After starting the car and turning on the recorder to enter the working state, find the WIFI starting with "QGCam-*****" in the mobile phone WIFI settings, and enter the password 12345678 to connect.

3. After the connection is completed, enter the "Viidure" APP, and the time of the recorder will be synchronized with the time of the current mobile phone. In addition, it is necessary to operate and format the TF card on the APP. (It must be formatted for the first use on the product, and it must be formatted one to three times a month regularly).

3. Installation Guide

Suggested installation schematic diagram:

1. Turn off the engine of the car.
2. Insert the TF card into the recorder card slot.
【Note】 Please use the TF memory card produced by the regular manufacturer, you can choose the memory card with a capacity of 8GB-128GB and a read/write speed not lower than U1/Class10.
3. Fix the recorder on the front windshield of the car's original rearview mirror.
4. Connect the car adapter to the car battery, connect the yellow wire to VCC, the red wire to the ACC ignition wire, and the black wire to the ground wire.
5. Use the charging extension cable to connect the USB interface of the recorder to the corresponding position of the car fuse box.

【Note】 The charging extension cable can be laid along the edge of the car windshield when wiring.

6. Adjust the position of the lens to make sure the lens is level with the ground.

7. Start the engine and check if the machine is installed correctly.

【Note】 When the machine is installed correctly, the system will indicate the signal to work; the machine will enter the recording state when the machine is started, and the display will show that it is recording. Please pay attention to check whether the picture on the display screen is normal. If the displayed picture is an inverted image, please adjust the image inversion through the APP in time.
