This picture comes with its own application program.

Customers can download and install their favorite application in
the browser

Dr System resolution selection

Because the original car system is retained, when the original car can not display/display incomplete, the resolution needs to be adjusted. The specific operation is as follows:

Open  To open the resolution option, As shown in the picture:

FactoryTest

Car type		Key template3				
<input checked="" type="radio"/> Bosch engine <input checked="" type="radio"/> Capacitive screen <input type="radio"/> Resistive screen1 <input type="radio"/> Resistive screen2 <input type="radio"/> Harman engine	<input type="radio"/> Resistive screen1 <input checked="" type="radio"/> Capacitive screen <input checked="" type="radio"/> dual view <input type="radio"/> Resistive screen2		3		<input checked="" type="radio"/> car1 <input type="radio"/> car2 <input type="radio"/> car3 <input type="radio"/> car4 <input type="radio"/> car5 <input type="radio"/> car6 <input type="radio"/> car7	<input type="radio"/> Resolution1 <input type="radio"/> Resolution2 <input type="radio"/> Resolution3 <input checked="" type="radio"/> Resolution4 <input type="radio"/> Resolution5 <input type="radio"/> Resolution6 <input type="radio"/> Resolution7

Judging method:

How to quickly distinguish between The single screen and double screen

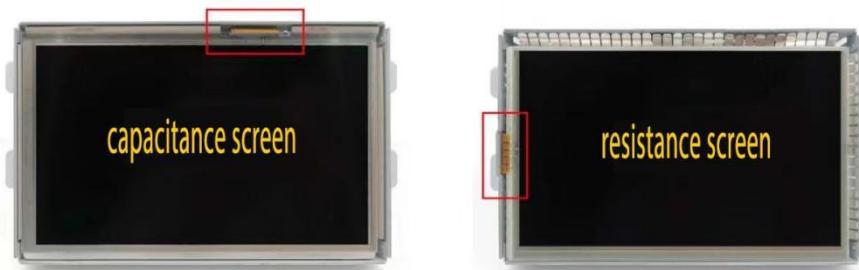

Method of Judgment:

- 1) The display of MODE or other symbols on the upper right of the key panel of the original car is: **single screen**
- 2) The upper right shows the 2/1 icon: **Double Screen**

How to quickly judge the difference between The capacitance screen and resistance screen

Method of Judgment:

- 1) the finger body can touch the control for: **capacitive screen**
- 2) The one controlled by stylus or nail stylus is: **resistive screen**
- 3) The discharge line **above** the display screen is capacitive screen, and the discharge line on the **left** is resistive screen

Bosch host selects original vehicle resolution

Steps 1-4 of original vehicle resolution setting: Setting - system setting - factory setting - password 2109 - vehicle model selection - enter the following interface			
1	Black screen or no contact	 	First, determine whether the original vehicle screen is a Resistive screen or a Capacitive screen , and select accordingly
2	The original vehicle has a black screen, or click to enter the original vehicle, and the machine will restart	 	Corresponding selection of single screen / double screen
3	The display of the original vehicle is not centered, and it is left or right:		Change the original vehicle video source 1-6, and one of the displays is normal
4	The original vehicle interface, and the buttons have no effect	 <p>1. The key template must correspond to the original vehicle button. (The right key navigation and phone are the opposite of the original vehicle. Ignore them.) Click in, slide up and down, find the corresponding module, and click to select it 2. After selecting the key template, the keys have no effect. Just change the model 1-7 in turn and return to the original vehicle interface to see if the key functions work</p>	
<p>After the resolution selection is completed, you can test the Android machine music. At this time, you need to click the original vehicle interface, audio/video, click My Music+, click+, select AUX/Auxiliary, and return to the Android interface to play music</p>			

If there is any problem with debugging, consult after-sales technicians ! ! !

Precautions for use

1. In order to enhance the viewing inside the carriage, the LCD screen of the monitor is exposed. Do not press the LCD screen, otherwise it may cause failure. When tapping the LCD screen, in addition to the touch screen coordinate correction, please be sure to tap with your fingers. Otherwise, you may chafe or get dirt.
2. When there is dust or dirt on the monitor on the clean screen, please first cut off the power supply and wipe gently with a soft cloth. When wiping the monitor, please pay attention to avoid being scratched by your nails. Do not use wet rags. Do not use volatile oil, thinner and other volatile drugs.

FCC Caution.

§ 15.19 Labelling requirements.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

§ 15.21 Information to user.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

§ 15.105 Information to the user.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning for Mobile device:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
