Request for a limited modular approval - FCC ID: A269ZUA138

Note: This module is limited to an automotive equipment environment exclusive to the Applicant.

Dear Application Examiner,

the module "G500-8 BT PWB" is seeking FCC authorization as a modular transmitter. The requirement of the FCC part 15.212 are met.

The following requirements are fulfilled:

1. The modular transmitter must have its own RF shielding

The radio portion of the module has its own RF shielding.

2. The modular transmitter must have buffered modulation/data inputs

The module has a memory management unit inside of the IC. It buffers the data inputs.

3. The modular transmitter must have its own power supply regulation

The IC contains an own voltage regulation. In case of changes in the supply voltage VCC (for example caused by temperature changes or other effects), the internal voltage will be stabilized.

4. The modular transmitter must comply with the antenna requirements of Section 15.203 and 15.204c

The transmitter has been tested with PCB Antenna placed on the host board.

5. The modular transmitter must be tested in a stand-alone configuration

The EUT was tested in a stand-alone configuration placed on a host board. The EUT was supplied by external power lines, independent from the host board.

6. The modular transmitter must be labelled with its own FCC ID number

The Module is labelled with its own FCC ID.

7. The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements.

The Module is limited to battery operation only (e.g. vehicular use). No connection to AC mains is allowed.

8. The modular transmitter must comply with any applicable RF exposure requirements.

The device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

Please contact us if you have any additional questions.

Best Regards,
