

**Request for Class II Permissive Change**

November 21, 2014

Federal Communication Commission  
Equipment Authorization Division  
Application Processing Branch  
7435 Oakland Mills Road  
Columbia, Maryland 21046

FCC ID : A269ZUA141  
Applicant : ALPINE ELECTRONICS, INC.

To Whom It May Concern:

This is to request a Class II permissive change for FCC ID: A269ZUA141, originally granted on 11/13/2013.

We added CDE-W265BT and CDE-164BT for this application, and we changed the following points are from the original model.

Please refer to attached "Theory of Opearation-Difference" for details of these modifications.

Meanwhile we submit the following documents related to this change. There is no change before and after change except for these documents.

<input checked="" type="checkbox"/>	Test Report (Comparison data)
<input checked="" type="checkbox"/>	External Photo
<input checked="" type="checkbox"/>	Internal Photo
<input checked="" type="checkbox"/>	User Manual
<input checked="" type="checkbox"/>	Label drawing/ location
<input checked="" type="checkbox"/>	Block Diagram
<input type="checkbox"/>	Specification
<input checked="" type="checkbox"/>	Schematic Diagram
<input type="checkbox"/>	Parts List

This time, we performed the testing for CDE-W265BT and confirmed that this product still meets the minimum requirements of the applicable rules of FCC. Please refer to the test report submitted with this application.

We did not perform the testing for CDE-164BT. The differences between CDE-W265BT and CDE-164BT cause no influence to radio specification. There is no degradation of EMC characteristic. Therefore we can consider them electrically identical.

Thank you for your attention to this matter.

Sincerely,

---

Yukie Ishikawa  
ALPINE ELECTRONICS, INC.
