RF Exposure / MPE Calculation

No. : 13722221S-A-R1

Applicant : ALPS ALPINE CO., LTD.

Type of Equipment : Display Audio Model No. : Music Halo FCC ID : A269ZUA164

ALPS ALPINE CO., LTD. declares that Model: Music Halo complies with FCC radiation exposure requirement specified in the FCC Rule 2.1091 (for mobile).

RF Exposure Calculations:

The following information provides the minimum separation distance for the highest gain antenna provided with the "Music Halo" as calculated from (B) Limits for General Population / Uncontrolled Exposure of TABLE 1- LIMITS FOR MAXIMUM PERMISSIBLE EXPOSURE (MPE) of §1.1310 Radiofrequency radiation exposure limits.

This calculation is based on the highest EIRP possible from the system, considering maximum power and antenna gain, and considering a 1mW/cm^2 uncontrolled exposure limit. The Friis formula used was:

$$S = \frac{P \times G}{4 \times \pi \times r^2}$$

Where

P = 18.92 mW (Maximum average output power)

☐ Time average was used for the above value in consideration of 6-minutes time-ave ☐ Burst power average was used for the above value in consideration of worst condit

G = 0.955 Numerical Antenna gain; equal to -0.2dBi

r = 20 cm (Separation distance)

Power Density Result $S = 0.00359 \text{ mW/cm}^2$

Even taking into account the tolerance, this device can be satisfied with the limits.
