(A) If wing a permanently affixed label, the modular iransmitter must be labeled with its own FCC identification number and, if the FCC identification number is own its for its own its for its own in the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior tabel can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains Transmitter Module FCC ID: AyzMODEL1" or "Contains Transmitter Module FCC ID: AyzMODEL1 or "Contains Transmitter Module FCC ID: AyzMODEL1" or "Contains Transmitter Module FCC ID: AyzMODEL1 or		lines shall be the length typical of		
unknown, at least 10 centimeters to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number is not visible when the module is sustaled inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label cen use wording such as the following: "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" and which must be included in the application for equipment anihorazion. or, miss provide adequate instructions along with the modular bichicaled in the explication for equipment anihorazion. (B) If the modular transmitter or on the device in which it is installed. If the modular is missalled in the explication for equipment anihorazion. (B) If the modular transmitter or on the device in which it is installed. If the modular is installed in the explication for equipment anihorazion. (B) If the modular transmitter or on the device in which it is installed. If the modular is installed. If the modular is installed in the explication for explainment almost the readily accessible and visible on the modular transmiter or on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exercine table can see wording such as the following: "Contains FCC certified transmiter module(s)." Any similar wording that expresses the same meaning may be tweed. The user manual must include instructions on how to access the electronic displa				
insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(0)). The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, in the module is installed must also display a tabel referring to the enclosed module. This exterior label can use wording such as the following: "Comtains Transmitter Module FCC ID: XYZMODEL!" or "Contains Transmitter Module FCC ID: XYZMODEL!" Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application of equipment authorization, (B) If the modular transmitter was to included in the application for equipment authorization, (B) If the modular transmitter was one electronic display of the FCC identification number is installed wished and the requirement, In the latter case, a copy of these instructions must be included in the application for equipment authorization, (B) If the modular transmitter was an electronic display of the FCC identification number, the information must be readily accessible and wishible on the modular transmitter was an electronic display of the FCC identification number, the information must be readily accessible and wishible on the modular transmitter was an electronic display of the FCC identification number, the information must be readily accessible and wishible on the modular is installed must display at label referring to the enclosed modular. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructi		_		
between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(0)). The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmiter must be labeled with its own FCC identification number, and, if the FCC identification number, and, if the FCC identification manher, and, if the FCC identification manher is not visible when the module is installed must also display a laber lefering to the enclosed module. This exterior label can use wording such as the following: "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" Any similar wording that expresses the same meaning must be used. The Grance may either provide such a label, on example of which must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, the modular transmitter or on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior label can asse wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display, A copy				
supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number, and, if the FCC identification number is not visible when the module is installed invide another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exertor label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or guipment and label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization, (B) If the modular transmitter was an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the modular transmitter was an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the modular transmitter was an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. The wording that expresses the same meaning may be used. The user manual must include instructions on how to access the lettornic display. A copy				
accessories, peripherals, or support equipment connected to the module during testing shall be ummodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If issing a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number and, if the FCC identification number is not visible when the module is installed mist dawn of the when the module is installed mist dawn of the whole is installed mist dawn display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" and wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the modular is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy				
equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its PCC identification number. (A) If using a permanently affixed label, the modular transmitter must be tabeled with its own PCC identification number, and, if the PCC identification number, and, if the PCC identification number is not visible when the module is installed misted another device, then the outside of the device into which the module is installed misted another device, then the outside of the device into which the module is installed mist also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC ID: XYMODEL1" or "Contains FCC ID: XYMODEL1" and ymilar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, contains the capable of the explain his requirement. In the later case, a copy of these instructions must be included in the application for equipment must be included in				
during testing shall be unmodified and commercially available (see Section 15.31(i)). The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed must also display a label referring to the enclosed module. This exterior label can use worting such as the following: "Contains FCC ID: XYZMODEL!." or "Contains FCC ID: XYZMODEL!." any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization or, must provide adequate instructions for equipment authorization on, must provide adequate instructions for equipment authorization on, and the explaint in requirement in the latter case, a copy of these instructions must be included in the application for equipment authorization on, and the case instructions and electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device, in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmiter module(s): Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy				
and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC ID: XYMODEL!" or "Contains FCC ID: XYMODEL!" or "Contains FCC ID: XYMODEL!" any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)" Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display, A copy		_ = =		
Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmiter must be labeled with its own FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application, or equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC dentification number, the information must be readily accessible and wistle on the modular transmitter or on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display, A copy		during testing shall be unmodified		
The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number and if the FCC identification number is not visible when the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Text ID. XYZMODELI." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the modulae which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment unborization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and wistble on the modular transmitter or on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy		and commercially available (see		
equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. 	requirements in its final	within the approval source provided to	
	configuration.	all users fo this module.	

A **limited modular approval** may be granted for single or split modular transmitters that do not comply with all of the above requirements, *e.g.*, shielding, minimum signaling amplitude, buffered modulation/data inputs, or power supply regulation, if the manufacturer can demonstrate by alternative means in the application for equipment authorization that the modular transmitter meets all the applicable Part 15 requirements under the operating conditions in which the transmitter will be used. Limited modular approval also may be granted in those instances where compliance with RF exposure rules is demonstrated only for particular product configurations. The applicant for certification must state how control of the end product into which the module will be installed will be maintained such that full compliance of the end product is always ensured.

Jenni Chun, General manager
