

Justification of waiving the SAR test

March 02, 2016

Federal Communications Commission
 Authorization and Evaluation Division
 7435 Oakland Mills Road,
 Columbia, MD 21046

FCC ID: A3L-EFNG935
Model : LED View Cover (EF-NG935)

We recommend to waive the SAR test the following reasons,

1. LED view cover doesn't affect on the NFC performance of the host device.
 It is same as NFC Tag (card) and does not have own power source.
 So it cannot operate by itself but operates by radiated power from the host (mobile).

2. LED view cover does not transmit anything but the host (mobile) can receive information from the cover in following situation. The communication between host and host (mobile) occurs less than 100ms and during the communication LED cover acts as NFC tag.
 - Accept or Reject phone call or alarm ring
