PCTEST TCB/CB
Div.of PCTEST Engineering Lab.,Inc.
6660-B Dobbin Road
Columbia, MD 21045

Subject : Samsung Electronics Co.,Ltd.
FCC ID : A3LGTP7320T

To Whom It May Concern

We attest to the following for this application:

GT-P7320T is based on GT-P7320.

The differences are below.

- a). block WCDMA Band 8 by SW
- b). change LTE Band 20 to WCDMA Band 5 by HW
 - LTE Band 20 PAM and matching block <⇔> WCDMA Band 5 PAM matching block
 - LTE Band 20 Saw filter 2pcs <⇔> WCDMA Band 5 Saw filter 2pcs

The antenna of GT-P7320T are all the same with that of GT-P7320.

There is "no change" between GT-P7320 and GT-P7320T except support RF Band.

So, It is possible to re-use all power FCC data for non-W850 operations from GT-P7320.

Should you have any questions or comments concerning the above, please contact the undersigned.

Sincerely

Soo pyoung (Patrick), Park / Engineer
