

**SAMSUNG ELECTRONICS CO. LTD., //A3LNX300 //AN13T0055 Notice #1**

Dear Anna,

You are listed as the Technical Contact for the above referenced TCB application. The following items need to be resolved before the review can be continued:

Please provide an attestation exhibit that clearly documents the following 6 items:

1) Submit a channel/frequency plan for this device showing the channels that have active scanning or passive scanning. Active scanning is where the device can transmit a probe (beacon) and passive scanning is where the device is can listen only with no probes.

**- 2.4G: Active scan, 5G: Passive scan**

2) Verify that this device does not have ad-hoc mode

**- This device doesn't support Ad-hoc**

3) Verify that this application contains a complete User's Manual and/or Professional Installers Manual. If the manual is not complete, upload an updated User's Manual exhibit.

**- Manufacturer is working on it right now. We'll upload and update as soon as possible. In the mean time, please review other items.**

4) Can this device act as an access point on the non-DFS legacy frequencies (5.15-5.25 MHz)

**- This device is only used as slave device, not AP.**

5) Verify that this device meets the frequency requirements of Section 15.202

**- This device meets the frequency requirements of section 15.202**

6) For client devices that have software configuration control to operate in different modes (active scanning in some and passive scanning in others) in different bands (devices with multiple equipment classes or those that operate on non-DFS frequencies) or modular devices which configure the modes of operations through software, the application must provide software and operations description on how the software and / or hardware is implemented to ensure that proper operations modes cannot be modified by end user or an installer.

**- Mentioned modification as above could be changeable by Cal data of IC manufacturer, but this would be possible by IC manufacturer only.**

7) The last internal photo is labeled as View of BT module, but there does not seem to be Bluetooth in this device. If this is a typo, please correct this.

**- Uploaded (It was corrected)**

8. The SAR test report has a '-' in the FCC ID which is different than all other exhibits. Please correct the SAR report.

**-Uploaded. Not only FCC ID has been corrected**

9. The User's Manual does not contain the Class B Digital Device Notice required by FCC 15.105. Please update the manual to include this notice.

**- Uploaded**

Please note that I am still finishing the review of the Test Reports, and may have further questions tomorrow, but wanted to give the opportunity for you to start gathering the responses for the above issues.
