MPR Explanation in HS(High-Speed)**

To Whom It May Concern:

We, Samsung Electronics, hereby declare the samples evaluated in this application are equivalent to production samples.

The power difference of HS test cases relative to WCDMA is as expected in the Reference Design.

We have applied 1dB extra MPR(Maximum Power Reduction) in all HS cases. This to maintain good margin with ACLR test cases when HS is applied

Should you have any questions or comments concerning the above, please contact the undersigned.

Sincerely,
