

SAMSUNG ELECTRONICS CO., LTD
129, Samsung-ro, Yeongtong-gu
Suwon-si, Gyeonggi-do, 443-742 Korea

Date: Dec.26, 2016

FCC ID: A3LSMA320F

We attest that

@ Test Case : HSDPA / HSUPA / DC-HSDPA Average Max power check.

<WCDMA B2>

HSUPA/HSDPA/DC-HSDPA : Subset 2/3/4 mostly lower than the tune up power with MPR

<WCDMA B5>

HSUPA/HSDPA/DC-HSDPA : Subset 2/3/4 mostly lower than the tune up power with MPR

<WCDMA 2 Reduced Power>

HSUPA : Subset 4 mostly higher than the tune up power with MPR

HSDPA / DC-HSDPA: Subset 3/4 mostly higher than the tune up power with MPR .

LTE: Powers are in the Tune-up tolerance and complies with the 3GPP.

@ Developer's opinion.

It is expected by manufacturer that MPR for some HSPA subtests may be up to 2dB more than specified by 3GPP, but also as low as 0 dB according to the chipset implementation in this model. The HSPA transmitter power will not exceed the R99 maximum transmit Power in this device

Sincerely,

CHANHO, YOUN
