 Title : RE: Follow-Up Questions Regarding FCC ID: A3LSMG316U_01-20-15

Hello,

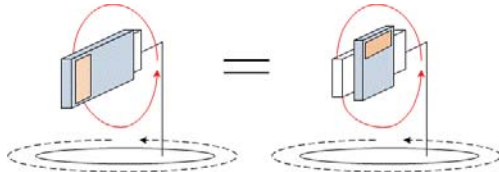

Thank you for your response.
 In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information:

1. Please verify that the EUT was oriented in three orthogonal axes during testing per section 6.3.1 of C63.4 for the radiated measurements as described in section 3.2 of the Part 22/24 test report and that the worst case measurements were reported as it looks as if only 2 orthogonal axes were tested. Please note that the EUT orientation also cannot be determined from the test set-up photographs.

The radiated tests were performed at Fully-anechoic chamber with mobile positioner which can rotate EUT to 360degree through azimuth and elevation angle, it is equivalent to test in 3-orthogonal planes.
 Please note the diagram below.

In addition, we have verified Z-polarizaion with both positioning below and the results were nearly identical.

2. Please provide the external and internal photographs of the device.

The items indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,
 PCTEST TCB
