6660-B Dobbin Road  
Columbia, MD 21045

Subject: Samsung Electronics Co., Ltd.  
FCC ID: A3LSMG9500

To Whom it May Concern

We attest the following:

1. MPR is permanently implemented for all channel BWs, modulations, frequency bands and RB sizes.
2. A-MPR was disabled for all SAR test samples for SAR testing purposes only.
3. We confirm the specific MPR targets and tolerances shown in the SAR Report. All deviations in the power measurements from the specific MPR targets shown in the SAR report are expected and within factory tolerances.
4. LTE implementation is limited. The uplink supports LTE CA\_41C as described in this filing. The uplink does not support other carrier aggregation combinations nor enhanced SC-FDMA. Features such as CoMP, HetNet, Relay, SON, cross carrier scheduling, eICIC, enhanced downlink MIMO, MBMS, M2M/D2 are also not supported. SVLTE is not supported as described in the operational description.

Should you have any questions or comments concerning the above, please contact the undersigned.

Sincerely,

A handwritten signature in black ink, appearing to read "Yeil Kim".
