

Set-up Photo for Antenna Gain measurement

* RTS60 Chamber

The Bluetest Reverberation Test Systems is the ideal choice for developers of wireless devices and components as well as operators wanting to verify their suppliers' wireless devices.

Over-The-Air (OTA) measurements reflect the true performance of the device and ensure that the tested product performs as intended once released to the market.

The patented design creates a rich and isotropic multipath environment inside the chamber allowing for fast, easy and realistic performance measurements on SISO as well as MIMO devices like LTE and WLAN.

The RTS is capable of performing passive measurements like antenna efficiency, diversity and MIMO gain as well as active measurements like TRP, TIS and Throughput (TPUT).
