Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046 USA

RE: FCC ID: A3LSMN981U

To Whom It May Concern:

This permissive change is to enable the following features via SW only:

- NR FR1 Standalone operations
- NR n41 PC2 Operations
- Enable EN-DC B41-n41 uplink capability
- Additional EN-DC FR2 Downlink Combination added

As there is no change in HW, Tx path, or power for any of the above operations, the NR test data in the original filing additionally demonstrates compliance for these added capabilities.

For the LTE B41-n41 EN-DC Capability, no additional SAR or HAC analysis was required beyond what was included in the original filing.

Best Regards,
