

Samsung Electronics Co., LTD.
129, Samsung-ro, Yeongtong-gu
Suwon-City, Gyeonggi-do, 443-742, Korea

Date: Dec. 18th, 2018

PCTEST TCB/CB

Subject: Samsung Electronics Co., Ltd.
FCC ID: A3LSMS260DL

To Whom it May Concern

We attest the following regarding FCC ID: A3LSMS260DL

1. MPR is permanently implemented for all channel BWs, modulations, frequency bands and RB sizes.
2. A-MPR was disabled for all SAR test samples for SAR testing purposes only.
3. We confirm the specific MPR targets and tolerances shown in the SAR Report. Some targets do not follow 3GPP guidance, however the MPR is permanently implemented by manufacturer design and cannot be modified by any third party, carrier, or network setting. Only those RB configurations allowed by 3GPP for the channel bandwidth and modulation combinations have been designed to have MPR. All configurations with RB allocations less than the RB thresholds required by 3GPP were tested without MPR, per KDB 941225 D05.
4. LTE Rel 10 implementation is limited. The uplink/downlink does not support carrier aggregation nor enhanced SC-FDMA. Features such as CoMP, HetNet, Relay, SON, cross carrier scheduling, eICIC, enhanced downlink MIMO, MBMS, M2M/D2 are also not supported. SVLTE is not supported as described in the operational description.
5. This device complies with FCC Part 27.75(a)(1) requirements: Mobile and portable stations that operate on any portion of frequencies in the paired 1755-1780 MHz and 2155-2180 MHz band must be capable of operating on all frequencies in the paired 1710-1780 MHz and 2110-2180 MHz band, using the same air interfaces that the equipment utilizes on any frequencies in the paired 1710-1780 MHz and 2110-2180 MHz band.
6. This device complies with FCC Part 27.75(a)(2) requirements: Mobile and portable stations that operate on any portion of frequencies in the 600 MHz band must be capable of operating on all frequencies in the 600 MHz band using the same air interfaces that the equipment utilizes on any frequencies in the 600 MHz band.
7. This devices complies with FCC Part 27.77 requirements: Mobile and portable stations in the 1695-1710 MHz and 1755-1780 MHz bands may operate only when under the control of a base station. Base stations that enable mobile or portable equipment to operate in the 1695-1710 MHz and 1755-1780 MHz band are subject to prior coordination requirements.

Should you have any questions or comments concerning the above, please contact the undersigned.

Sincerely,

Jenni Chun
