Cover Letter for supplemental SAR report and EMC report on RSDB operation mode

To whom it may concern:

A supplemental SAR report (for PCB, DTS, NII and DSS equipment codes) and supplemental EMC report (for DTS and NII equipment codes) are provided to address simultaneous transmissions in the 5GHz and 2.4GHz bands when operating in RSDB modes as this operating mode was added after completion of the original testing.

Sincerely,

JunWhan.Lee/ Operation Leader
