February 4, 2006

RE: Samsung Electronics Co. Ltd.

FCC ID: A3LSWL-2460

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) The labeling for this device is still incorrect. It appears that you might be seeking a full unrestricted Modular Approval for this device. Both FCC and IC regulations require that the module itself be labeled, not just the printer into which this device may be installed. In addition, there is no Canada labeling with CN number available. Please provide labeling for the module itself complete with FCC ID and Canada identifiers.
- 2.) The Modular Approval letter is not clear in its intentions. Are you seeking a full unrestricted Modular Approval or a Limited Modular Approval (LMA) restricted to specific models and types of printers? Please review your modular approval request letter.
- 3.) The Test Report in section 13.2 shows an antenna gain that does not match the reported antenna gain shown in the RF Exposure exhibit. Please review.
- 4.) Please confirm that only channels 1-11 will be used for product shipped to North America.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
