Subject; Request for DFS Waiver
FCC ID: A3LWEA554

This letter serves as a request to the FCC Authorization and Evaluation Division to waive DFS radar testing required by KDB 388624 D01 Pre-Approval Guidance v11r01 on the **A3LWEA554**.

Reasoning for Waiver:

This device uses the same radio, chipset and solution as the WEA524i (FCC ID: A3LWEA524I) which was DFS Radar tested to the New Rules.

Software which supports the DFS radar detection functionality is identical as well and has been adjusted for the different antennas used with the WEA524i per DFS test report #CTKL04-U2 Rev A (Limited to DFS testing) dated 16th August 2017 (New Rules).

Sincerely,

Name: Kim, Jong-in

Date: September 4, 2018

Title: Senior Engineer
