Applicant/Grantee Samsung Electronics Co., Ltd.						
FCC ID: A3LWIC210S						
Section 15.212 Modular Transmitters						
Request	for Modular Approval 🛛 Requ	uest for Limited Modular Approval				
	Requirements	EUT Conditions	Comply (Y/N)			
Single Modular Approval Requirements						
1	The radio elements of the modular	OK	Y			
	transmitter must have their own					
	shielding. The physical crystal and					
	tuning capacitors may be located					
	external to the shielded radio					
	elements.					
2	The modular transmitter must have	OK	Y			
	buffered modulation/data inputs (if					
	such inputs are provided) to ensure					
	that the module will comply with Part					
	15 requirements under conditions of					
	excessive data rates or over-					
	modulation.	A DC DC				
3	The modular transmitter must have its	A DC-DC converter is configured for	Y			
	own power supply regulation.	internal supply of the module.				
4	The medules to a smitter and a small	Connected to antenna with internal	Y			
4	The modular transmitter must comply with the antenna and transmission		Y			
	system requirements of Sections	transmission line and matching.				
	15.203, 15.204(b) and 15.204(c). The					
	antenna must either be permanently					
	attached or employ a "unique"					
	antenna coupler (at all connections					
	between the module and the antenna,					
	including the cable). The					
	"professional installation" provision					
	of Section 15.203 is not applicable to					
	modules but can apply to limited					
	modular approvals under paragraph					
	(b) of this section.					
5	The modular transmitter must be	OK	Y			
	tested in a stand-alone configuration,					
	<i>i.e.</i> , the module must not be inside					
	another device during testing for					
	compliance with Part 15					
	requirements. Unless the transmitter					
	module will be battery powered, it					
	must comply with the AC line					
	conducted requirements found in					
	Section 15.207. AC or DC power					
	lines and data input/output lines connected to the module must not					
L	connected to the module must not					

contain ferrites, unless they will be marketed with the module (see Section 15.27(a)). The length of these lines shall be the length typical of actual use or, if that length is unknown, at least 10 centimeters to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. Y Mark the FCC-ID certification number on the module label.	
marketed with the module (see Section 15.27(a)). The length of these lines shall be the length typical of actual use or, if that length is unknown, at least 10 centimeters to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. Wark the FCC-ID certification number on the module label.	
Section 15.27(a)). The length of these lines shall be the length typical of actual use or, if that length is unknown, at least 10 centimeters to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.

Wark the FCC-ID certification number on the module label.	
supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. Mark the FCC-ID certification number on the module label.	
accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	
accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	
equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	
during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. Wark the FCC-ID certification number on the module label.	
and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	
Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. Mark the FCC-ID certification number on the module label.	
The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. Mark the FCC-ID certification number on the module label.	
The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. Mark the FCC-ID certification number on the module label.	
equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number.	
affixed label or must be capable of electronically displaying its FCC identification number.	
electronically displaying its FCC identification number.	II.
identification number.	
identification number.	
(A) If using a permanently affixed label, the	
modular transmitter must be labeled with its	
own FCC identification number, and, if the	
FCC identification number is not visible	
when the module is installed inside another	
device, then the outside of the device into	
which the module is installed must also	
display a label referring to the enclosed	
module. This exterior label can use wording	
such as the following: "Contains Transmitter	
Module FCC ID. YYZMODELL" on "Contains FCC	
FCC ID: XYZMODEL1" or "Contains FCC	
ID: XYZMODEL1." Any similar wording	
that expresses the same meaning may be	
used. The Grantee may either provide such a	
label, an example of which must be included	
in the application for equipment	
authorization, or, must provide adequate	
instructions along with the module which	
explain this requirement. In the latter case, a	
copy of these instructions must be included in	
the application for equipment authorization.	
(B) If the modular transmitter uses an	
electronic display of the FCC identification	
number, the information must be readily	
accessible and visible on the modular	
transmitter or on the device in which it is	
installed. If the module is installed inside	
another device, then the outside of the device	
into which the module is installed must	
display a label referring to the enclosed	
module. This exterior label can use wording	
such as the following:	
"Contains FCC certified transmitter	
module(s)." Any similar wording that	
expresses the same meaning may be used.	
The user manual must include instructions on	
how to access the electronic display. A copy	
of these instructions must be included in the	

	application for equipment authorization.		
7	The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with the module to explain any such requirements. A copy of these instructions must be included in the application for equipment authorization.	Module usage manuals were provided.	Y
8	The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	For RF exposure requests, ensure that RF specs are entered and adhered to within the approval source provided to all users fo this module.	Y

A **limited modular approval** may be granted for single or split modular transmitters that do not comply with all of the above requirements, *e.g.*, shielding, minimum signaling amplitude, buffered modulation/data inputs, or power supply regulation, if the manufacturer can demonstrate by alternative means in the application for equipment authorization that the modular transmitter meets all the applicable Part 15 requirements under the operating conditions in which the transmitter will be used. Limited modular approval also may be granted in those instances where compliance with RF exposure rules is demonstrated only for particular product configurations. The applicant for certification must state how control of the end product into which the module will be installed will be maintained such that full compliance of the end product is always ensured.
