Subject: Attestations and Requests, **FCC ID : A3LXE503C32, IC: 649E-XE503C32**

To the Commission,

We, the undersigned **SAMSUNG ELECTRONICS CO. LTD.**, attest that this device software and associated drivers will not initiate any transmission on DFS bands without initiation by a master. This includes restriction on transmissions for beacons and support for Ad-Hoc peer to peer modes.

Moreover, this device supports active scanning operation in only channels 1~11 for and passive scanning operation with 12~13 channels for 2.4GHz and all channels for 5GHz. It means that the firmware on this device restricts the operation in the passive scanned bands without initiation by master. Country code selection by end user is also disabled because we set the country code with world-wide code.

Respectfully,

A handwritten signature in black ink, consisting of a stylized 'S' and 'L'.
