MD 21046

Date: September 29, 2016

Subject: Attestations and Requests for **FCC ID : A3LXE513C24**

To whom it may concern:

We, the undersigned **Samsung Electronics Co., Ltd.**, attest that the software of this device and associated drivers will not initiate any transmission on DFS bands without initiation by a master. This includes restriction on transmissions for beacons and support for Ad-Hoc peer to peer modes.

Moreover, this device supports active scanning operation in only channels 1~11 for 2.4GHz and passive scanning operation with all channels for 5GHz. It means that the firmware on this device restricts the operation in the passive scanned bands without initiation by master. Country code selection by end user is also disabled because we set the country code with world-wide code.

Sincerely,

A handwritten signature in black ink, appearing to be the name "Younghyun Song".
