Subject: Limited Module Approval for **A4C01001A**

To Whom It May Concern:

We, RAND MCNALLY & COMPANY, hereby request a Limited Module Approval as provided in Section 15.212 of the FCC Rules. The requirements of this section have been fulfilled as follows:

- 15.212(a)(1)(i); Requirement of RF Shielding: The module meets the radiated emissions limits of sections 15.209 and 15.249 of the FCC Rules.
- 15.212(a)(1)(ii); Requirement of Buffered Input: The module does not provide a direct data input to the modulator.
- 15.212(a)(1)(iii); Requirement of Power Supply Regulation: The module incorporates its own power supply regulators.
- 15.212(a)(1)(iv); Antenna Requirement: The module works with a 50OHM matching antenna etched on the TND-760 PCB. This modular approval intends on using the module with the same antenna design for future products.
- 15.212(a)(1)(v); Stand-Alone Test Configuration: The module was tested in a standalone test configuration as described in the test report.
- 15.212(a)(1)(vi)(A); Labeling Requirement: The module will be labeled with its own FCC identification number, and the device into which the module is installed will display a label referring to the enclosed module. A picture of the external label is included with the documentation.
- 15.212(a)(1)(vii); Operating Requirements: The module meets the specific rules for this type of transceiver, and the User's Manual contains instructions for maintaining compliance.
- 15.212(a)(1)(viii); RF Exposure: The module complies with RF exposure requirements as demonstrated in the test report.

Sincerely,

Maged Riad
Director, Engineering
RAND MCNALLY & COMPANY
