

Application scenario description

Step 1. Connect the device as shown above.

Step 2. Play the music by BT / AUX/SD.

Step 3. Turn the second, third and fourth Music Kit to AUX model, then the whole Music Kits will play the same music as the first one.

NOTE: You can use the headphone of anyone, there would be unaffected to others.

When audio units are all linked together under AUX mode, connect one audio unit to an AUX device, the existing one will take priority over all Audio units. If another Audio unit is connected with a second source it will control any Audio unit following it and without a connected AUX device.

Specification

Output	15V3.2A

FCC Warning :

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment .

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
