

<p>Solder Board-Component View 14</p>	 <p>A photograph of a small, rectangular green printed circuit board (PCB) component. The board is positioned on a blue textured surface. A metal ruler is placed vertically to the left of the board, showing a scale from 0 to 10 millimeters. A second metal ruler is placed horizontally below the board, showing a scale from 0 to 10 millimeters. The board has several small components, including a central chip and various solder joints.</p>
<p>Solder Board-Component View 15</p>	 <p>A photograph of a circular green printed circuit board (PCB) component. The board is positioned on a blue textured surface. A metal ruler is placed vertically to the left of the board, showing a scale from 0 to 10 millimeters. A second metal ruler is placed horizontally below the board, showing a scale from 0 to 10 millimeters. The board is densely populated with various electronic components, including a large orange component, several small capacitors, and a central chip. Two red and black wires are connected to the board.</p>

<p>Solder Board-Component View 16</p>	 <p>A photograph of a circular solder board component. The component is a green PCB with a central hole and a spiral of white conductive traces. A yellow wire is attached to the spiral. Two red and black wires are connected to the top edge. The component is placed on a blue textured surface next to a metal ruler for scale. The ruler shows the component is approximately 10 mm in diameter.</p>
<p>Solder Board-Component View 17</p>	 <p>A photograph of the same circular solder board component from a different angle. This view shows the green PCB with various components, including a central hole, a spiral of white traces, and a small orange component. The component is placed on a blue textured surface next to a metal ruler for scale. The ruler shows the component is approximately 10 mm in diameter.</p>
