

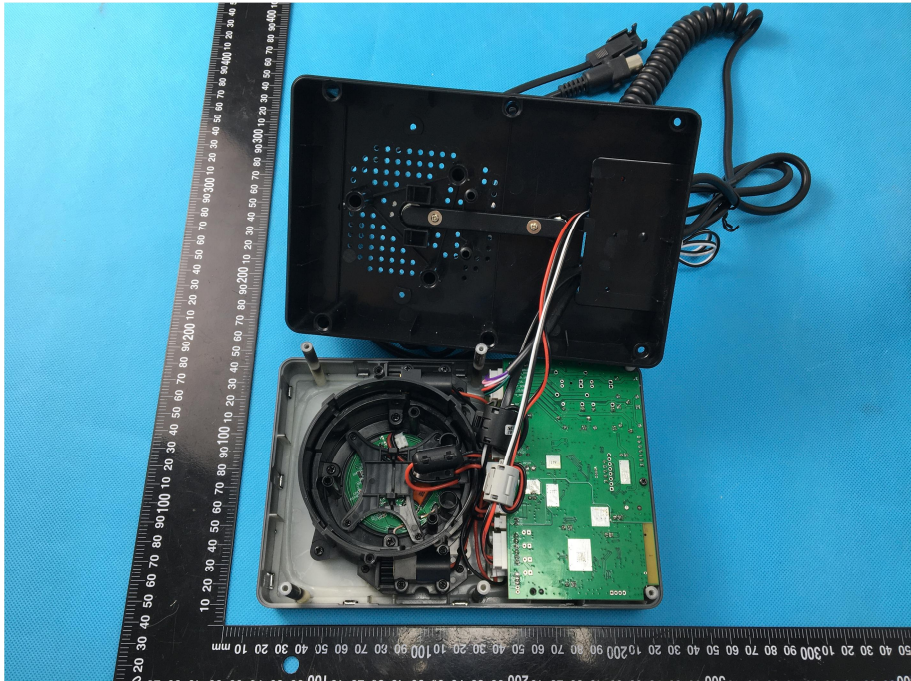

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

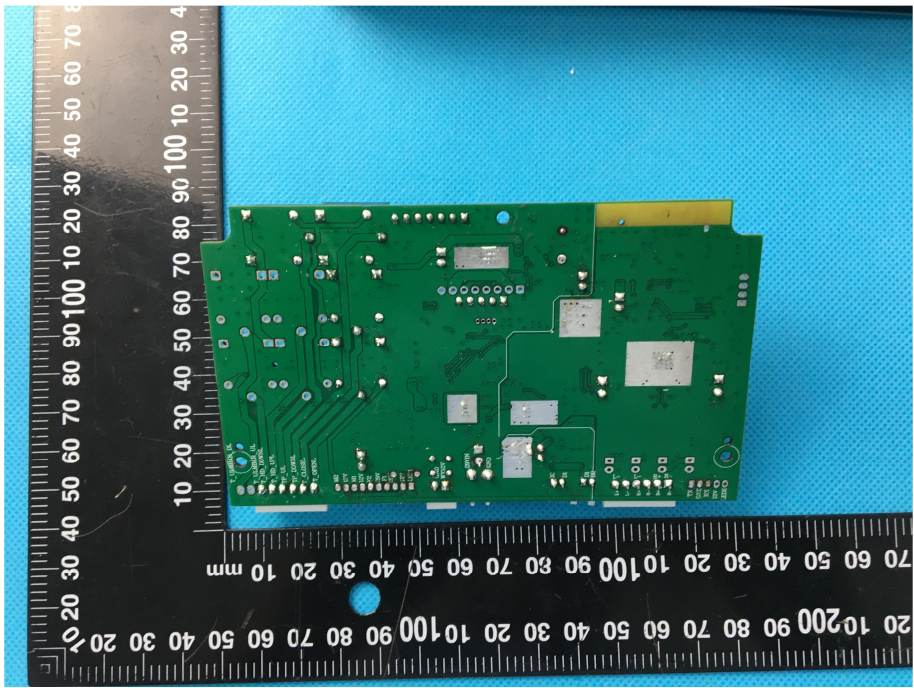

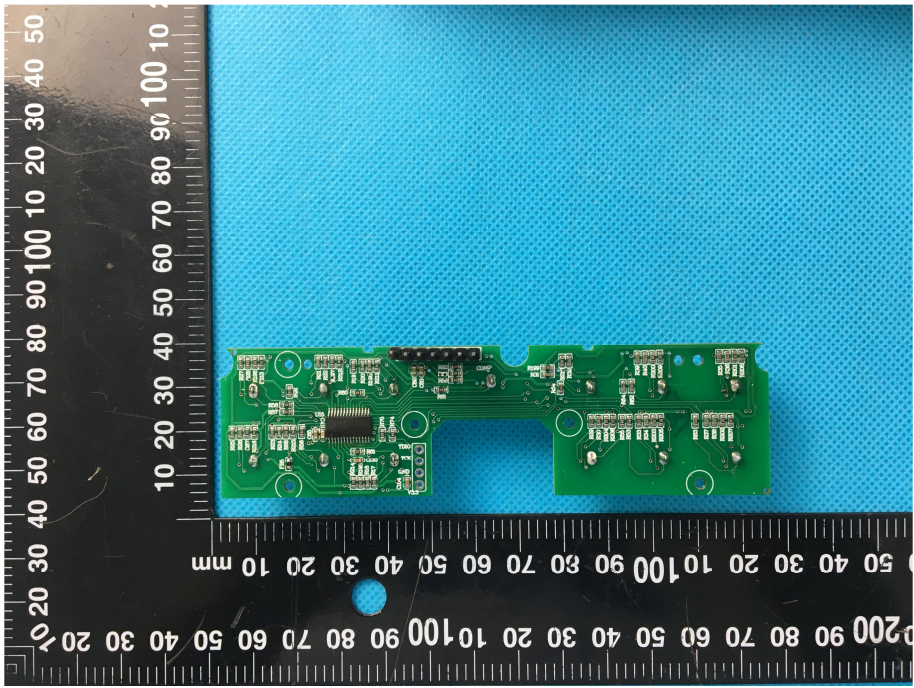

<p><b>EUT Housing and Board View 1</b></p>	 A photograph showing the internal components of an EUT (End User Terminal) housing. The top black plastic cover is removed and placed to the right, revealing a green printed circuit board (PCB) mounted inside a grey plastic base. A black cooling fan is visible on the left side of the board. Various wires and connectors are attached to the board. A black ruler is placed vertically on the left side of the assembly for scale, showing measurements in millimeters. The background is a blue textured surface.
<p><b>Solder Board-Component View 1</b></p>	 A close-up photograph of the green PCB component. The board is populated with various electronic components, including integrated circuits, capacitors, and resistors. Two large black electrolytic capacitors are prominent, with the brand name "GOLDEN" visible on them. A black ribbon cable is connected to the board. A black ruler is placed vertically on the left side of the board for scale, showing measurements in millimeters. The background is a blue textured surface.

<p style="text-align: center;"><b>Solder Board-Component View 4</b></p>	 A photograph of a green printed circuit board (PCB) component, labeled as View 4. The board is rectangular with a complex layout of copper traces and various electronic components. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters. The board is set against a blue textured background.
<p style="text-align: center;"><b>Solder Board-Component View 5</b></p>	 A photograph of a green printed circuit board (PCB) component, labeled as View 5. This board is narrower and more elongated than the one in View 4. It features a similar layout of copper traces and components. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters. The board is set against a blue textured background.
