

<p style="text-align: center;">Solder Board-Component View 6</p>	 <p>A photograph of a green PCB component with 12 circular solder pads arranged in two rows of six. The component is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 100mm long and 20mm wide. Text on the component includes 'Mini2_KC1', 'VLO T12mm', '0303-20-10', and '81923-14807-211118'.</p>
<p style="text-align: center;">Solder Board-Component View 7</p>	 <p>A photograph of a green PCB component with a curved edge and 12 circular solder pads along the curve. The component is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 100mm long and 20mm wide. Text on the component includes 'Mini2_KC1', 'VLO T12mm', '0303-20-10', and '81923-14807-211118'.</p>

<p style="text-align: center;">Solder Board-Component View 8</p>	 <p>A photograph of a small, rectangular green printed circuit board (PCB) component. The board is positioned on a blue textured surface. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board features a white connector on the left side and a small square component on the right side. The text 'GND' and 'LATCH' is visible on the board.</p>
<p style="text-align: center;">Solder Board-Component View 9</p>	 <p>A photograph of a circular green PCB component. The board is positioned on a blue textured surface. A black ruler with white markings is placed vertically to the left of the board, showing measurements in millimeters from 0 to 100. The board is densely populated with various electronic components, including a large orange capacitor, several integrated circuits, and numerous surface-mount components. Two wires, one red and one black, are connected to the board. The text 'USB' is visible on the board.</p>

<p>Solder Board-Component View 10</p>	 A photograph showing a circular component with a green PCB and a black center, mounted on a blue textured surface. The component has a white spiral pattern on its top surface and a yellow wire on its left side. A red and black wire is connected to the right side. A black ruler with white markings is visible on the left and bottom, showing measurements in millimeters.
<p>Solder Board-Component View 11</p>	 A photograph showing two circular components on a blue textured surface. The component on the right is a green PCB with a black center and a red component on its surface. The component on the left is a dark, circular metal part. A red and black wire is connected to the right component. A black ruler with white markings is visible on the left and bottom, showing measurements in millimeters.
