2   Getting started
2.1 The Battery
The lithium battery can be charged and discharged hundreds of times. Please use the approved batteries, and only use the battery charger approved by the phone producer to charge your battery.
2.2 Install / remove battery & SIM Cards
1. If the battery has been installed, remove it following the direction.

yezz
2. As follows, insert SIM 1 or SIM 2 with the angle towards the bottom right and SIM 3 with angle towards bottom left.
3. As follows, install battery, match battery metal touch point with mobile phone's metal touch point.
2.3 Memory card installation

Turn off the phone, and take out the battery.Keep the gold color side of the Memory card downward, and put it inside until it is locked.To remove the Card, push it inward and it will be popped up automatically.

(OPTIONAL)
* UP TO 32 GB
2.4 Charging

Connect the charger to power supply, and then insert the charger pin into the buttom of side jack.

Note:

1. It is beneficial to the battery to charge it until full at the first three times.

2. When charging, don't remove or take out the battery to avoid the battery circuit to burn out.

3. While charging, it is normal that the phone and charger will become hot.

4. If the battery is completely empty, it may take a period of time before the charging icon appears on the display.
2.5 Storage Management

To manage U disk and memory card storage space.

1. Connect to a computer

The USB function of the phone can be activated no matter the phone is powered on or off.

While being power off, the phone will enter resource manager directly after the USB cable has plugged in.

While being power on, the phone will enter the window of "USB Config" after the USB cable has plugged in. Please select "Mass Storage" item. If the memory card has already been installed, you will find both U disk and memory card as removable disks on your PC.

Some folders have already existed. Save the file in corresponding folder in order to use it normally. For example, Mp3 in Mp3 folder, Video in Mp4 folder, Photos in Photos folder, Download Pictures in Images folder, Record in Audio folder, Files received by bluetooth in Received folder.

After finished the operation, if you want to exit, click the USB icon on underside-right of computer, select to stop the USB device, and remove it after the information "USB device can be remove" appears.

2. Format

If you format the U disk or memory card, all files saved in it will be lost. By two ways you can format your U disk or Memory card:

Format by phone:

Enter my files—>options —>more—>format phone memory.

Format by computer:

Please complete the format work as following steps.

(1) Right click "My computer", select "manage", and enter to select "storage"—>" Disk manage"

(2) Right click the disk which is corresponding to the memory card, select

2.6 Earphone plug in

PLUG EARPHONES TO ENJOY
YOUR FAVORITE MUSIC

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio technician for help.

Specific Absorption Rate (SAR) information:

This wireless phone meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of allpersons regardless of age or health.FCC RF Exposure Information and Statement The SAR limit of USA (FCC) is 1.6W/kg averaged over one gram of tissue. Device types: CLASICO 2 (FCC ID: A4JCLASICO2   ) has also been tested against this SAR limit. The highest SAR value reported under this standard during product certification for use at the ear is 1.53W/kg and when properly worn on the body is 0.82W/kg. This device was tested for typical body-worn operations with the back of the handset kept 1.5cm from the body. To maintain compliance with FCC RF exposure requirements, use accessories that maintain a 1.5cm separation distance between the user's body and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 1.5 cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
