

RF Exposure / MPE Calculation

No. : 32DE0080-HO-01

Applicant : LOGICAL PRODUCT CORPORATION
Type of Equipment : LP-RF24DS-01
Model No. : LP-RF24DS-01
FCC ID : A4MLP-RF24DS-01

LOGICAL PRODUCT CORPORATION declares that Model : LP-RF24DS-01 complies with FCC radiation exposure requirement specified in the FCC Rules 2.1091 (for mobile).

RF Exposure Calculations:

The following information provides the minimum separation distance for the highest gain antenna provided with the "LP-RF24DS-01" as calculated from FCC OET Bulletin 65 Appendix A, Table (B) Limits for General Population / Uncontrolled Exposure. This calculation is based on the highest EIRP possible from the system, considering maximum power and antenna gain, and considering a 1.0mW/cm² uncontrolled exposure limit. The Friis formula used was:

$$S = (P * G) / (4 * \pi * r^2)$$

Where

P = 2.34 mW (Maximum peak output power)
G = 2.09 Numerical Antenna gain; equal to 3.20 dBi
r = 20.0 cm

For: LP-RF24DS-01

$$S = 0.00097 \text{ mW/cm}^2$$
