History of this test report

Version	Description	Issue Date
01	Initial issue of report	Jun. 23, 2023

1. Introduction Section

FCC ID: A4RGKWS6 (parent model) and FCC ID: A4RG9BQD (variant model) use the same identical internal printed circuit board layouts, while the variant model depopulates mmWave related components, details are available in the operational description. Based on their similarity, the FCC Part 15C (equipment class: DCD, DXX) and FCC Part 22, 24, 27, 90, 96 (equipment class: PCE, CBE) reuse the original model's result and do spot-check, following the FCC KDB 484596 D01 v01. The spot check data in this report is used to justify the data reuse.

The applicant should take full responsibility that the test data as referenced in this report represent compliance for this FCC ID: A4RG9BQD.

2. Model Difference Information

A4RGKWS6 and A4RG9BQD use the identical internal printed circuit board layout, and the difference in the components population:

- A4RG9BQD: 5G NR FR2 mmWave related components are depopulated.
- A4RG9BQD: WLAN and BT Ant 4 antenna matching is different.

The detail of similarity and difference is illustrated in the operational description, and based on the information spot check on conducted power and emission was performed for ensure compliance

3. Spot Check Verification Data Section

Conducted power test and radiated spurious emission test configurations were selected from the worst cases identified in the parent model and tested to demonstrate the test data from original model remains representative for the variant model.

Summary for power and RSE spot check for each FCC rule part is listed as below:

Conclusion:

Radiated spurious emission test against the variant model based on the worst-case condition from the original model was performed in this filing to demonstrate the test data from original model remains representative for the variant model.

The spot check emission level is not degraded more than 3dB, and the margin to the limit is greater than 1.5dB, data referencing is justified according to the guidance in the KDB inquiry
