RE: FCC ID: A4RGQML3

To Whom It May Concern:

This permissive change is to enable the following features via SW only:

- Additional n41 70MHz bandwidth

As there is no change in HW, Tx path, and maximum output power is same as what reported in the original grant (08/16/2022), for the additional n41 70MHz bandwidth which is enabled by software, the compliance for the following aspects can be covered by the testing performed in the original filing

- RF exposure: Part 0 SAR Characterization Evaluation report, Part 1 SAR test report, Part 2 TAS validation report, MPE report
- HAC: HAC RF, HAC T-Coil test report

Best Regards,

A handwritten signature in blue ink that reads 'Eric Huang'.
