

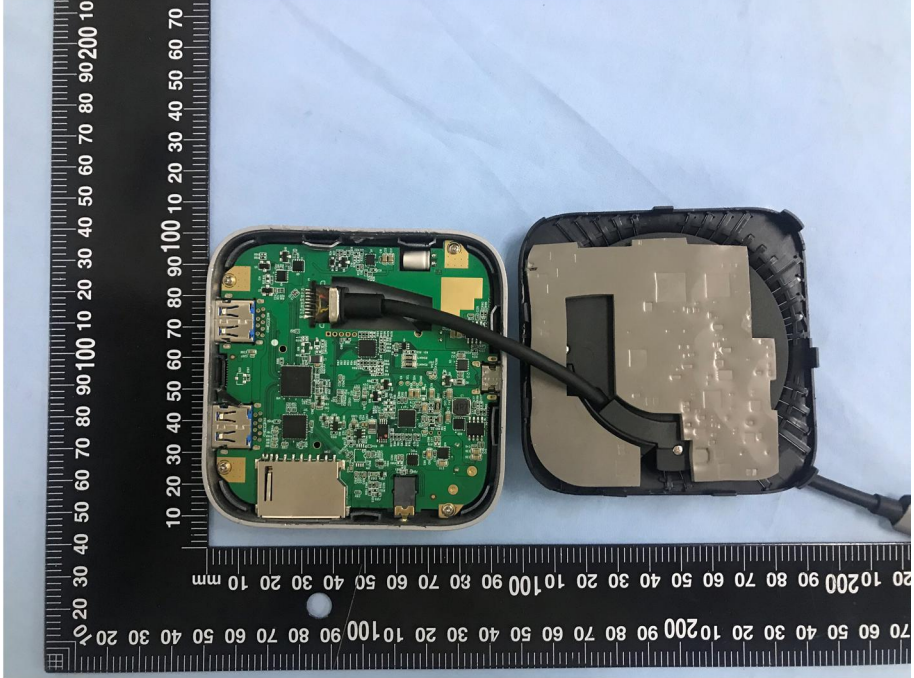

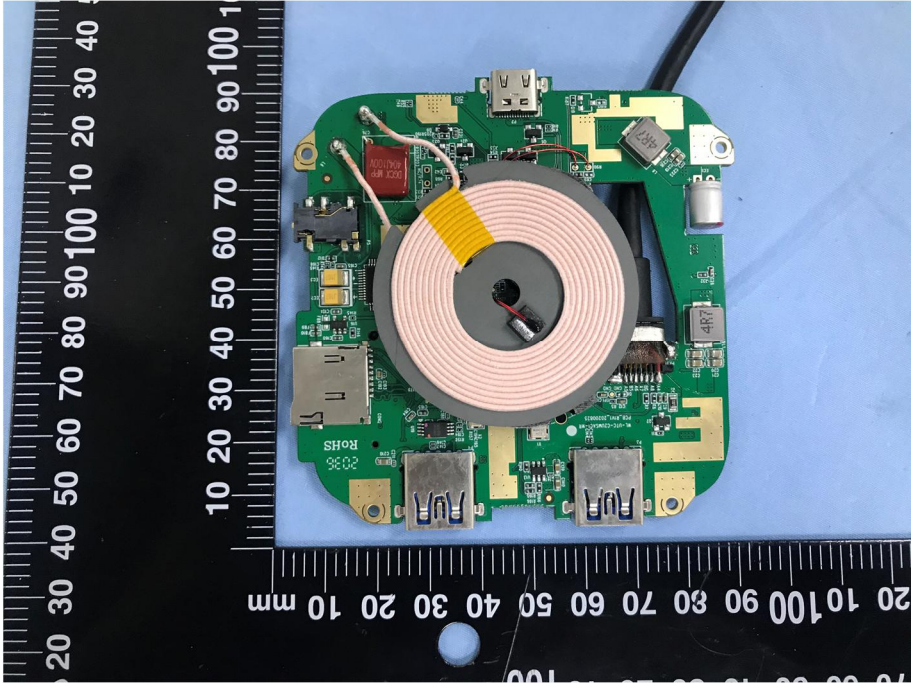

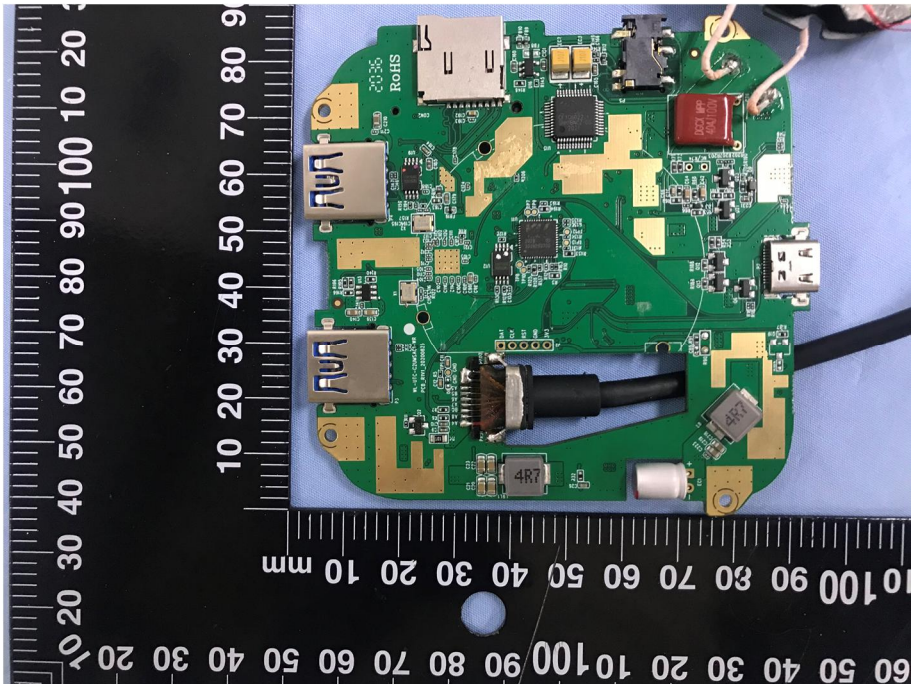

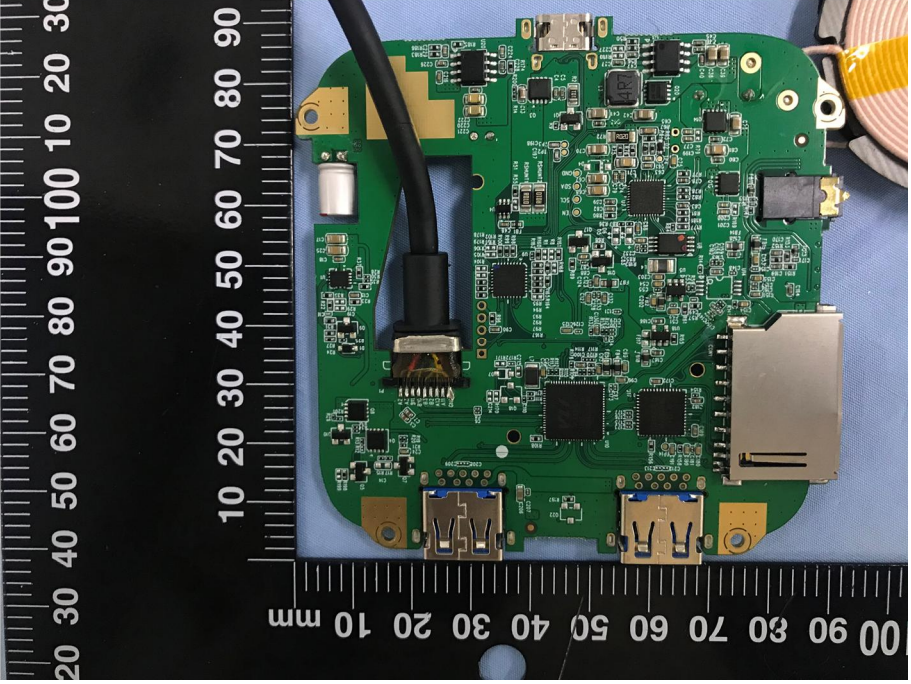

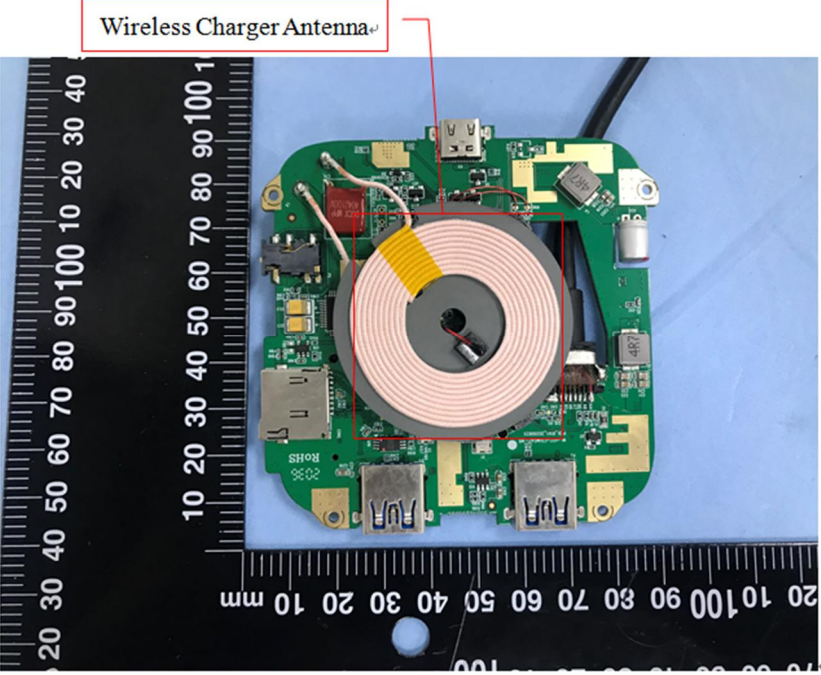

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 <p>A photograph showing the internal components of an EUT (End User Terminal) housing. The green printed circuit board (PCB) is visible, connected to a black cable. The housing is partially disassembled, revealing the battery compartment. A black ruler is placed horizontally below the components for scale, with markings in millimeters and centimeters.</p>
<p>Solder Board-Component View 1</p>	 <p>A close-up photograph of the solder board components. The green PCB is shown with various electronic components, including a large circular component (likely a coil or inductor) and several surface-mount components. A black ruler is placed vertically to the left of the board for scale, with markings in millimeters and centimeters.</p>

<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph of a green printed circuit board (PCB) with various electronic components. The board is positioned on a black ruler with white markings in millimeters. A black cable is plugged into a connector on the left side of the board. The board features several integrated circuits, capacitors, and other surface-mounted components. The ruler shows measurements from 0 to 100 mm.</p>
<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph of the same green PCB from a different perspective. The board is placed on a black ruler with white markings. A black cable is plugged into a connector on the right side. The board is populated with various components, including a red component labeled '4R7', a silver component labeled '4R7', and a component labeled 'Rohs'. The ruler shows measurements from 0 to 100 mm.</p>

<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph of a green printed circuit board (PCB) with various electronic components. A black cable is connected to a port on the left. A ruler is placed vertically on the left side of the board, showing measurements from 0 to 100 mm. The board features several connectors, including USB ports and a micro-USB port, and various integrated circuits and passive components.</p>
<p style="text-align: center;">Antenna View</p>	 <p>A photograph of the same green PCB from a different perspective, focusing on a circular antenna. The antenna is a spiral-shaped coil of copper wire on a grey substrate. A red rectangular box highlights the antenna, and a red line points from the text "Wireless Charger Antenna" to it. A ruler is placed vertically on the left side of the board, showing measurements from 0 to 100 mm. The board also shows various connectors and components.</p>
