Set Up Your Camera

Step 1 Download

Download the Tuya Smart or Smart Life App from the Apple AppStore or Google Play, or by scanning the QR code below.

Download on the
APP Store

Get it on
Google play

Step 2 Connect it to the APP

1. Sign up a App account, go to the app homepage, tap Add Device, and select the smart cameraIWi-Fi].

7
⚠ Please follow the prompts of the App to allow relevant permissions, otherwise it will affect the addition and use of the device.
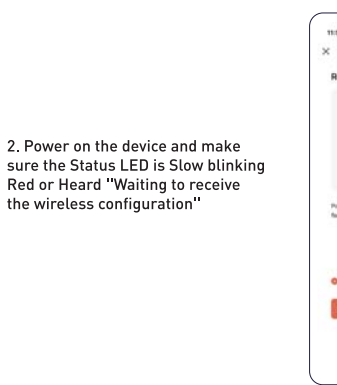

2. Power on the device and make sure the Status LED is Slow blinking Red or Heard "Waiting to receive the wireless configuration"

⚠ Please choose a 2.4GHz Wi-Fi, the camera does not support the 5GHz Wi-Fi.

3. Please click Next, select a stable network and enter a password. The camera of the device scans the QR code generated by the mobile phone, keep a distance of 15 to 20cm and do not move until the sound of " Di " is heard, and finally follow the steps on the App to complete the addition.

⚠ When adding devices, please make the camera and mobile phone connect to a same Wi-Fi router.

Mount Your Camera

Choose a good spot for Mounting

The camera can be placed on a table, shelf, or can be mounted on a wall or ceiling. Choose a spot where you can get the desired view, and can reach a power outlet easily.
Table or shelf   Mounted on a wall   Mounted on a ceiling

Placement Guidelines

Consider the surroundings

Is a walls, light or anything blocking the view? It might throw off exposure, focus or Night Vision. Please Keep the Indoor Cam at least 0.7 ft / 20 cm away from walls or anything.

Keep Camera in range of router

Make sure to choose a place within the signal range of your home WiFi. Please finish the Adding device steps before you mount your camera.

Near the outlet

An electrical outlet is required near the installation spot to power the camera.

Safe

To avoid risk of overheating and burns:
Use only in temperatures between 14° and 122°F (-10° to 50°C). Do not block airflow to Indoor Cam.
To avoid risk of fire and shock:
Use only provided power cable and power adapter, install in accordance with building and installation codes where you live.
To avoid risk of other serious injury:
Keep camera and all components out of the reach of children and pets.
Mount the Indoor Camera

Place your camera on a flat surface, or install it on a wall or ceiling with the provided mounting screws.

To mount the Camera on the wall:
Step 1

Place the Positioning Card where you want the camera.For wall mounting, drill two holes through twocircles.

Step 2

Affix two mounting screws with the help of Positioning Card,Insert two anchors into holes and screw the screws into the anchors.

Step 3

Hang your camera on the screws. Slide the camera base down until the camera is firmly mounted on the wall.

Step 4

Tilt and swivel to adjust the camera angle.

To mount the Camera on the ceiling:

Please follow the steps 1-3 to secure the camera onto the ceiling, then swivel to adjust the camera angle.

⚠ To unmount your Essential Indoor Camera, slide the camera up, then pull the camera away from the wall.

RF exposure statement

This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.

This equipment meets the exemption from the routine evaluation limits in section 2.5 of RSS-102. It should be installed and operated with a minimum distance of 20cm between the radiator and any part of your body.

Cet é quipement est conforme à l'exemption des limites d'é valuation habituelle de la section 2.5 de la norme RSS-102. Il doit ê tre install é et utilis é à une distance minimale de 20 cm entre le radiateur et toute partie de votre corps.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

IC WARNING

This device contains licence-exempt transmitter(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:
(1) This device may not cause interference.
(2) This device must accept any interference, including interference that may cause undesired operation of the device.
