

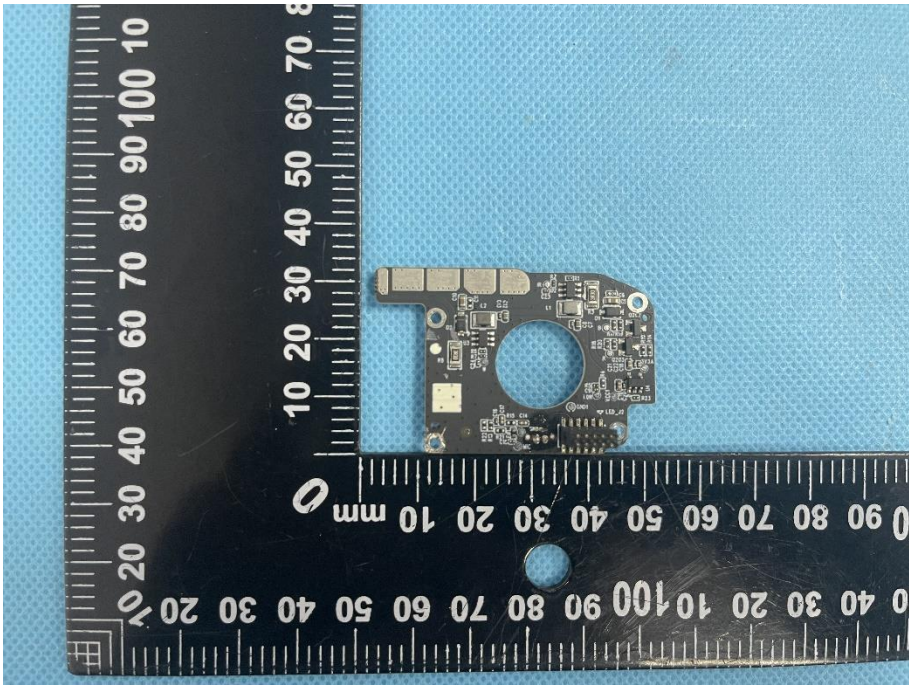

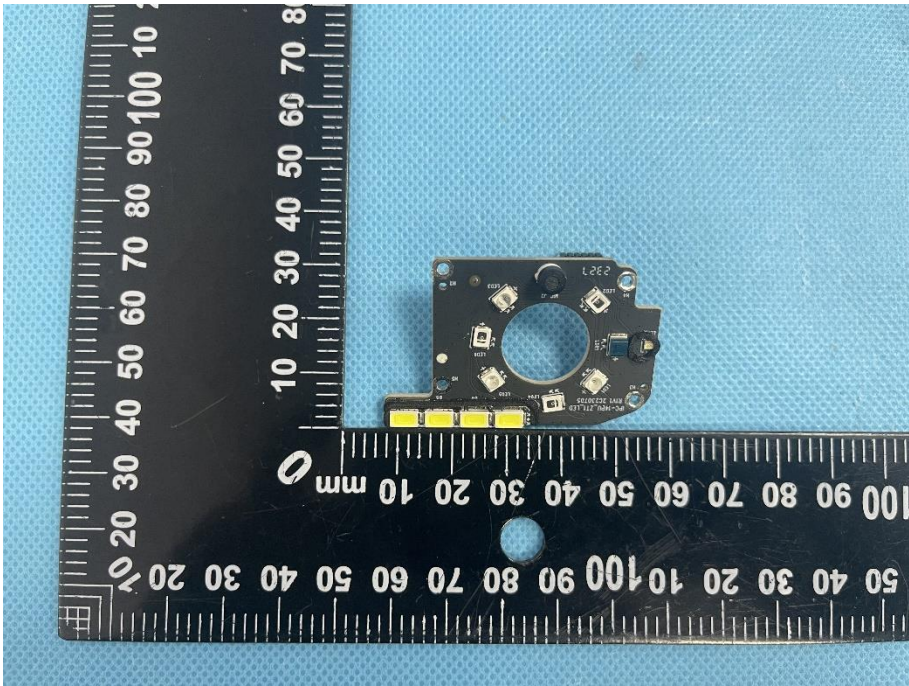

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

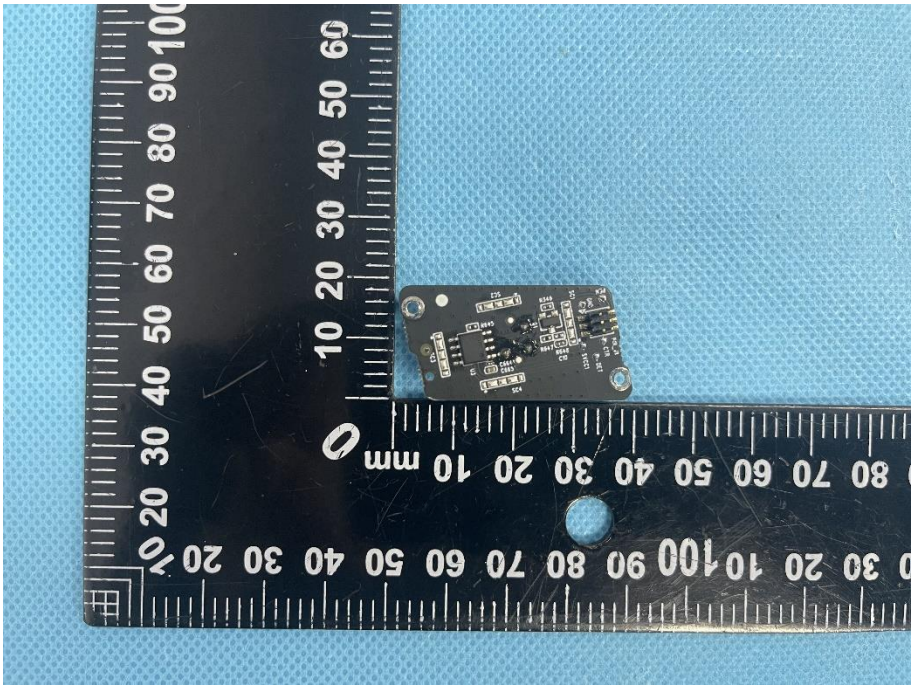

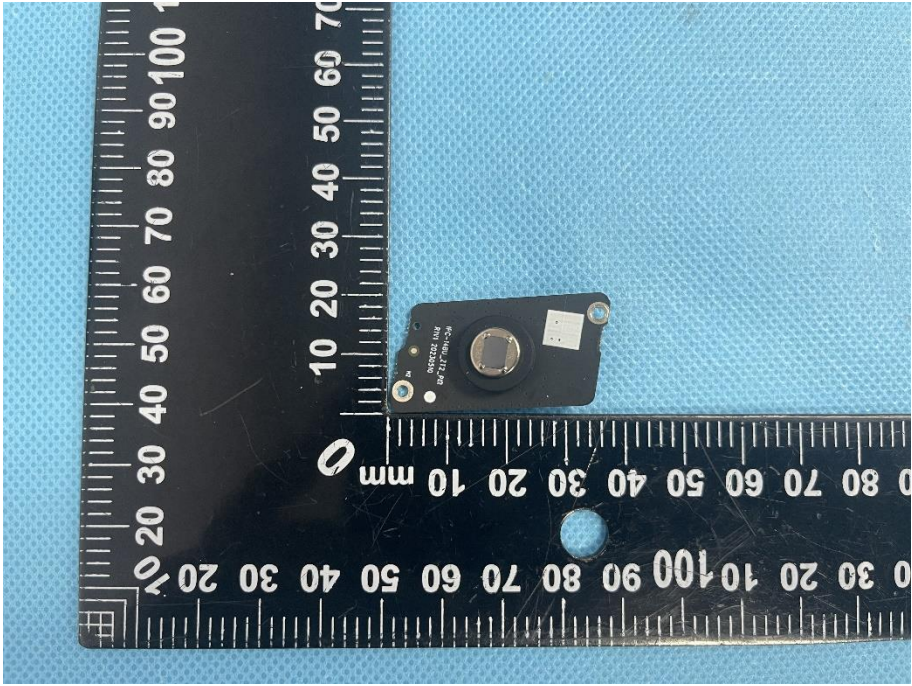

**EUT Housing and
Board View 1**

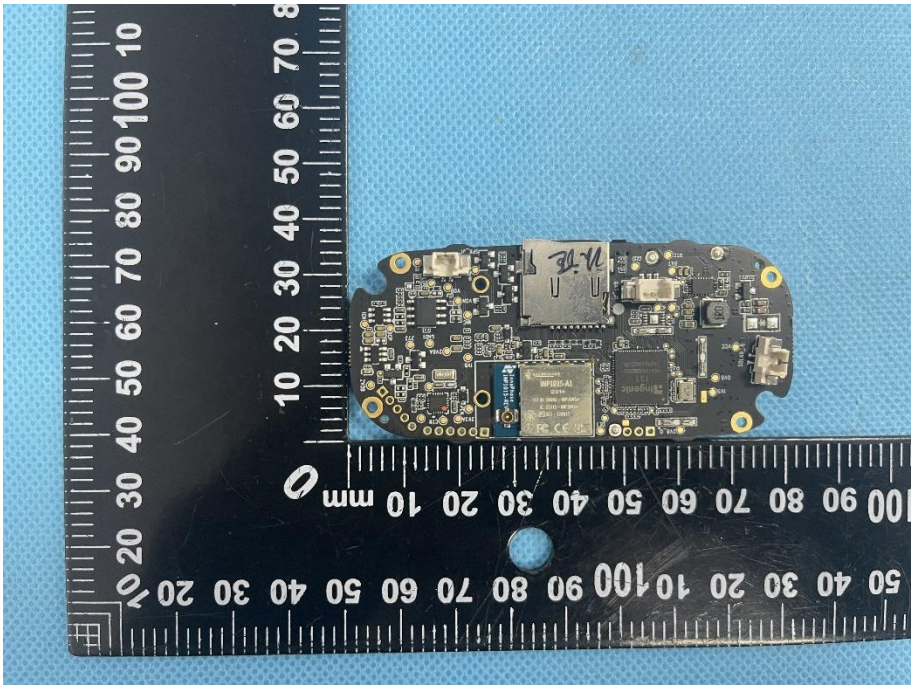

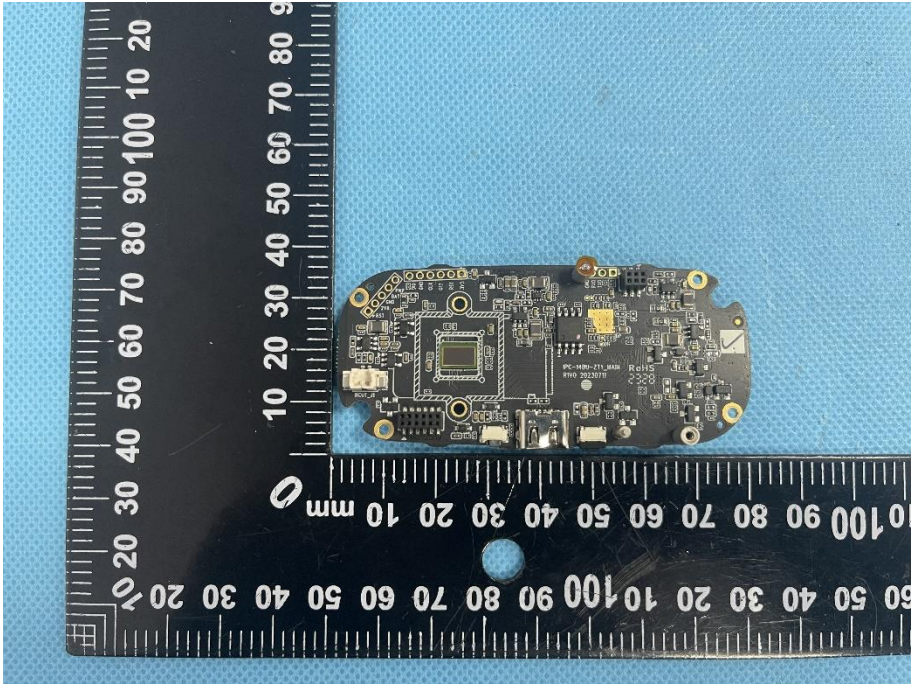

**EUT Housing and
Board View 2**

<p>Solder Board-Component View 1</p>	 A photograph of a small, irregularly shaped printed circuit board (PCB) component. The component is dark green or black with various electronic components soldered onto it, including a large circular hole in the center, several smaller holes, and various surface components. It is placed on a blue textured background. A black ruler with white markings is positioned to the left and bottom of the component, showing measurements in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.
<p>Solder Board-Component View 2</p>	 A photograph of the same PCB component from a different perspective. The component is shown from a slightly different angle, highlighting different features and components. It is placed on the same blue textured background. A black ruler with white markings is positioned to the left and bottom of the component, showing measurements in millimeters. The ruler is oriented vertically on the left and horizontally at the bottom.

<p>Solder Board-Component View 3</p>	 <p>A photograph showing a small, rectangular black printed circuit board (PCB) component. The component is positioned on a blue textured surface. A black L-shaped ruler is placed next to it for scale. The ruler has white markings in millimeters, with the vertical scale on the left and the horizontal scale on the top. The component is oriented vertically, with its longer side parallel to the vertical ruler. The component's surface is populated with various electronic components, including a central integrated circuit (IC) with several pins, and several smaller surface-mount components. The component is held in place by a blue circular marker on the ruler.</p>
<p>Solder Board-Component View 4</p>	 <p>A photograph showing the same small, rectangular black PCB component from a different perspective. The component is positioned on a blue textured surface. A black L-shaped ruler is placed next to it for scale. The ruler has white markings in millimeters, with the vertical scale on the left and the horizontal scale on the top. The component is oriented vertically, with its longer side parallel to the vertical ruler. The component's surface is populated with various electronic components, including a central circular component, possibly a lens or a sensor, and several smaller surface-mount components. The component is held in place by a blue circular marker on the ruler.</p>

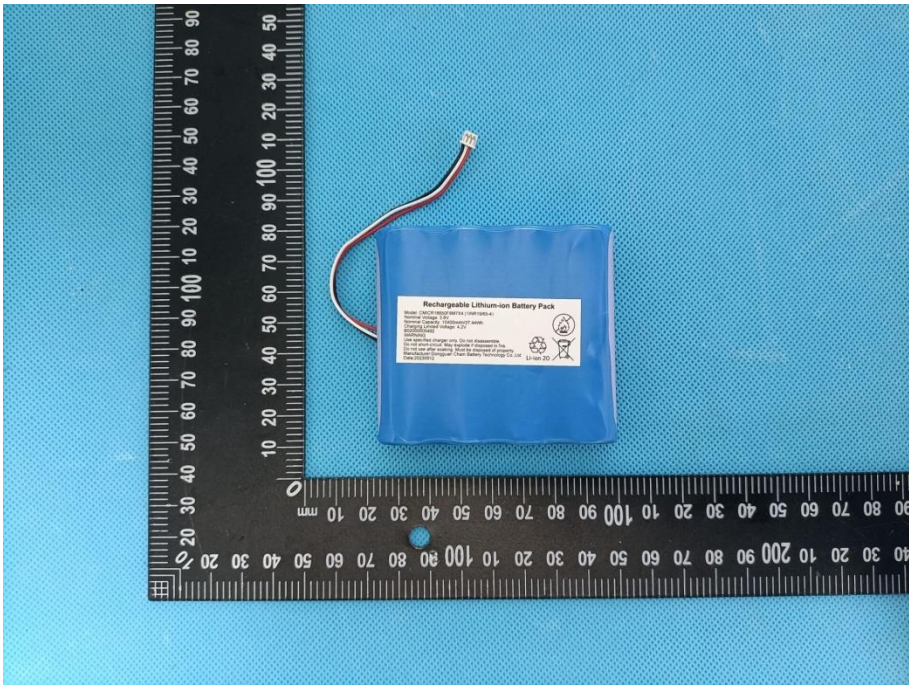

<p>Solder Board-Component View 5</p>	 <p>A photograph of a small, dark-colored printed circuit board (PCB) component, likely a solder mask or a small board, placed on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm. The component features various electronic components, including a large integrated circuit (IC) in the center, several smaller components, and a connector on the right side. The component is marked with 'A-2' and 'U'.</p>
<p>Solder Board-Component View 6</p>	 <p>A photograph of the same small, dark-colored PCB component from a different perspective. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm. The component features various electronic components, including a large integrated circuit (IC) in the center, several smaller components, and a connector on the right side. The component is marked with 'A-2' and 'U'.</p>
