

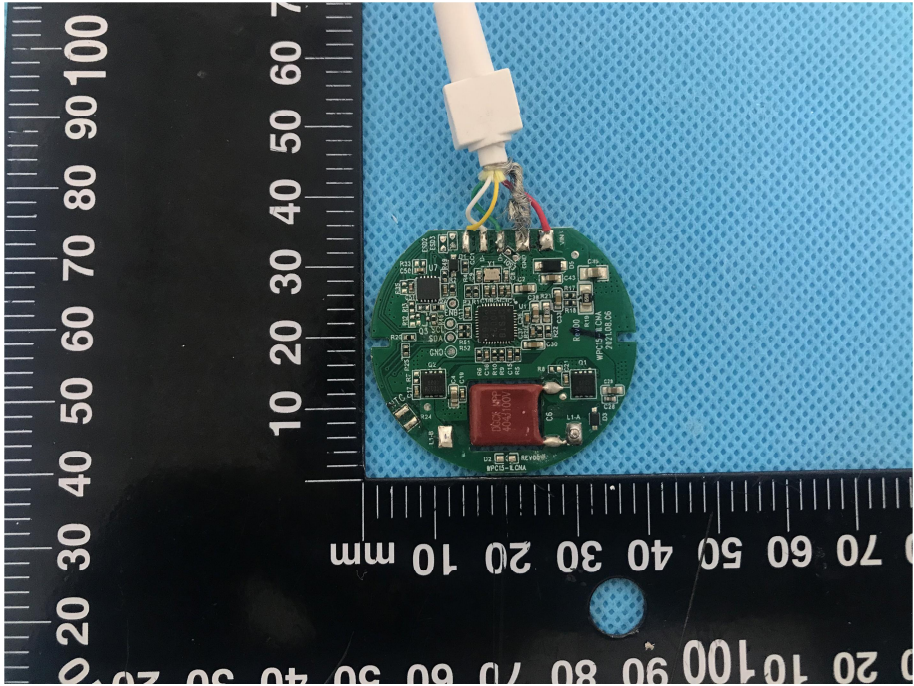

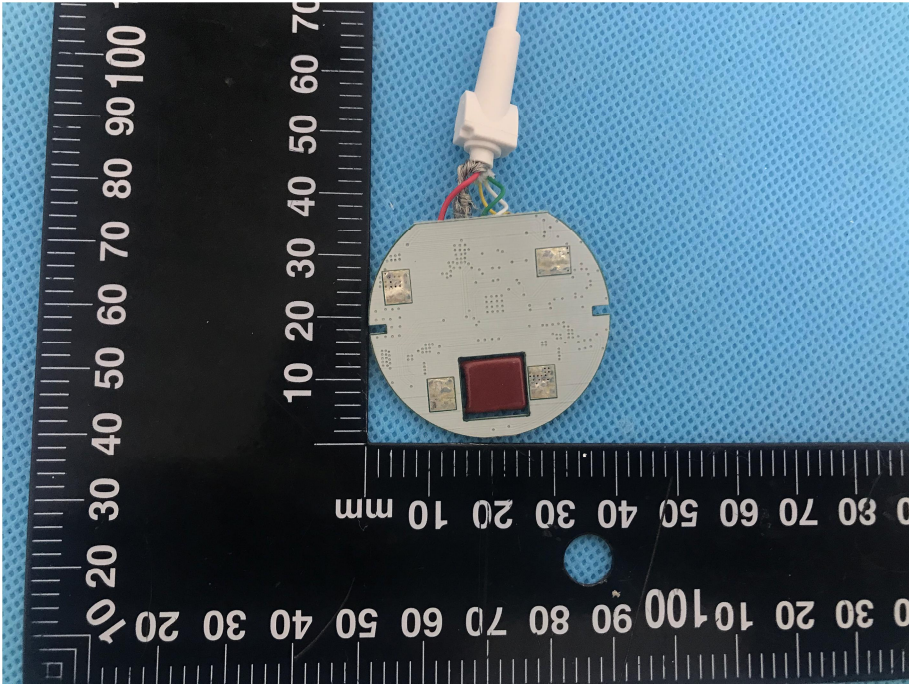

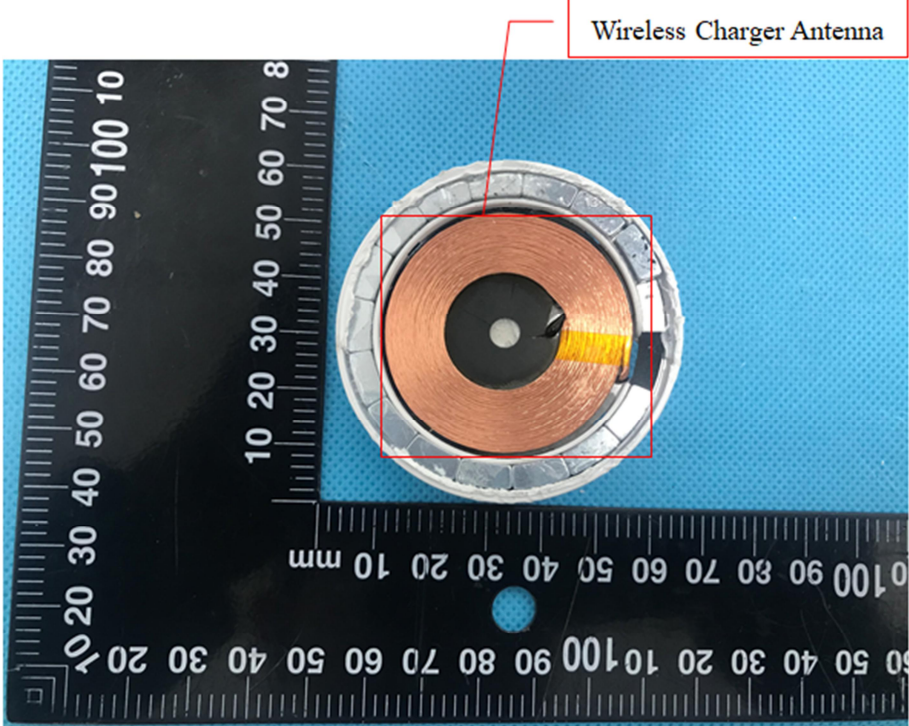

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing the internal components of a white plastic housing. On the left, a green printed circuit board (PCB) is visible, featuring various electronic components including a red integrated circuit, several resistors, and a small black component. A white cable is connected to the board. On the right, the white plastic housing lid is shown, which has a metal component mounted on its inner surface. A black ruler with white markings is placed below the components for scale, showing measurements in millimeters.
<p>Solder Board-Component View 1</p>	 A close-up photograph of the green PCB from the previous view. The board is populated with various electronic components, including a large red integrated circuit, several resistors, and a small black component. A white cable is connected to the board. A black ruler with white markings is placed below the board for scale, showing measurements in millimeters.

<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph showing the solder side of a circular PCB component. The component is mounted on a blue textured surface. A white connector with red, green, and blue wires is attached to the top. A red rectangular component is visible on the board. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters.</p>
<p style="text-align: center;">Antenna View</p>	 <p>A photograph showing the antenna side of the circular PCB component. The component is mounted on a blue textured surface. A copper coil antenna is visible, with a yellow wire connected to it. A red box highlights the antenna area, and a red line points to a label "Wireless Charger Antenna". A black ruler with white markings is placed below the component for scale, showing measurements in millimeters.</p>
