

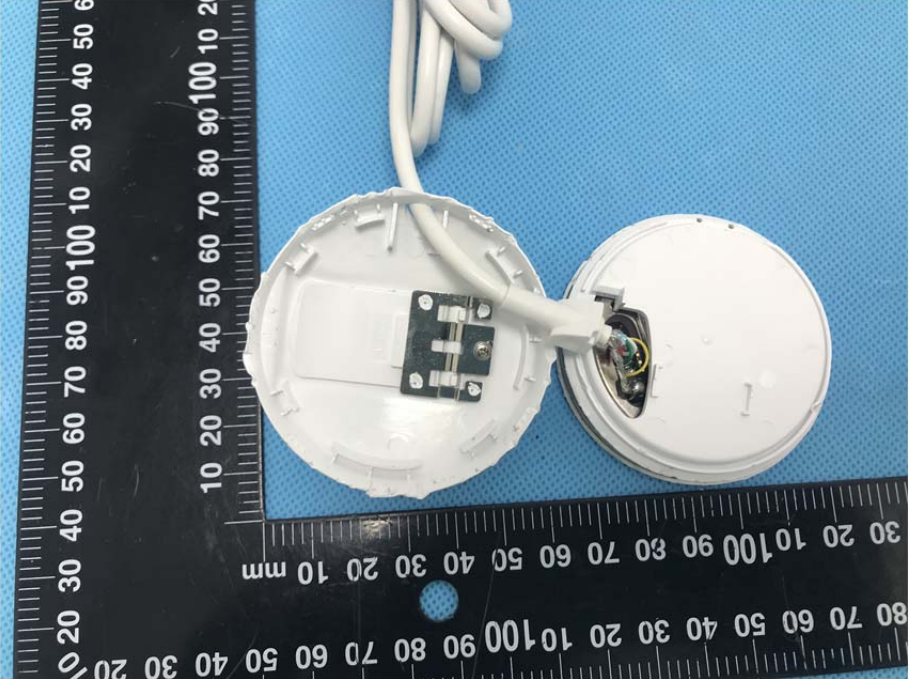

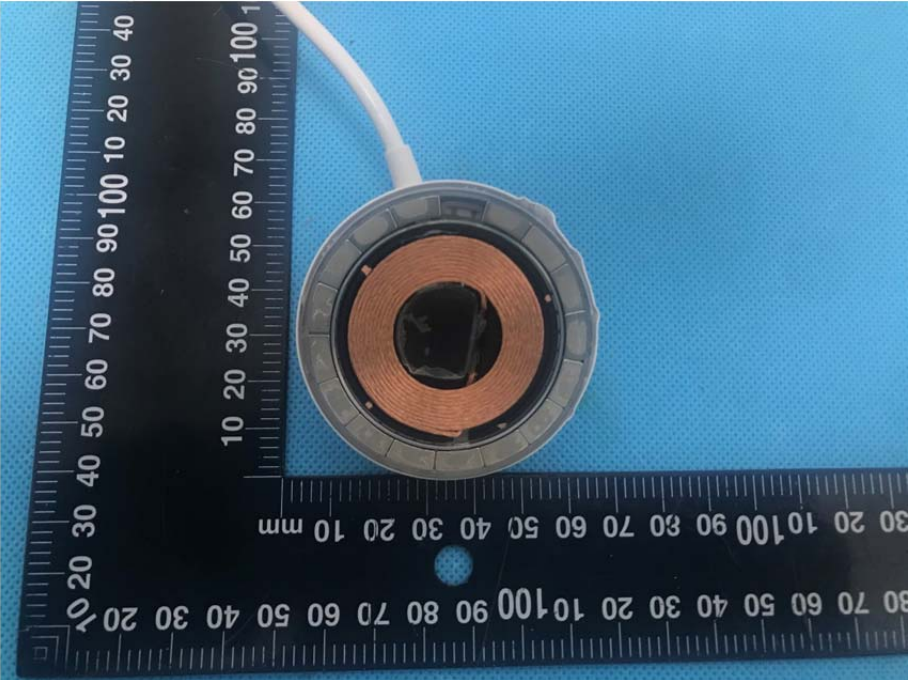

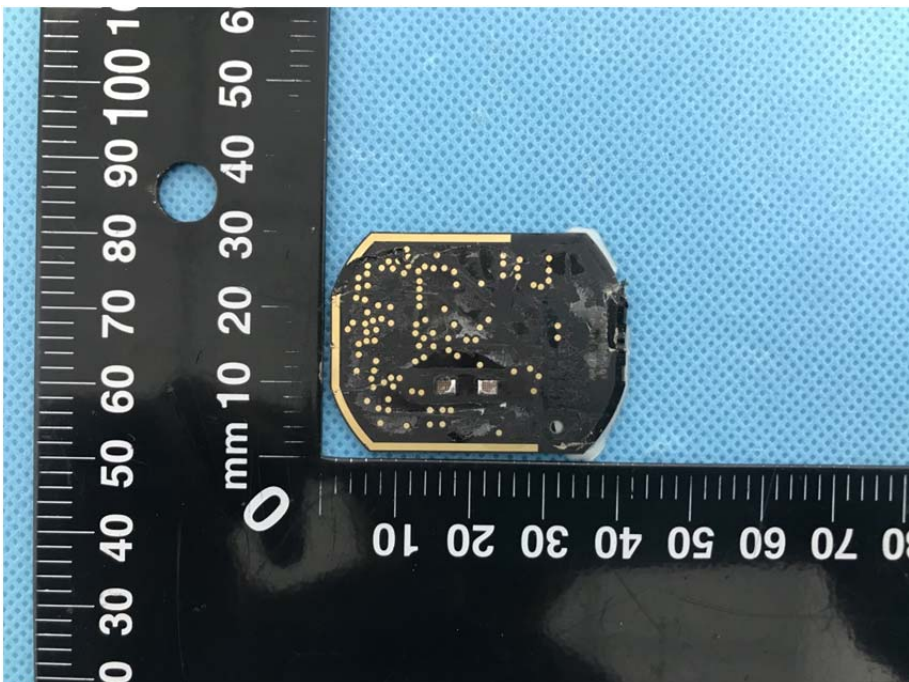

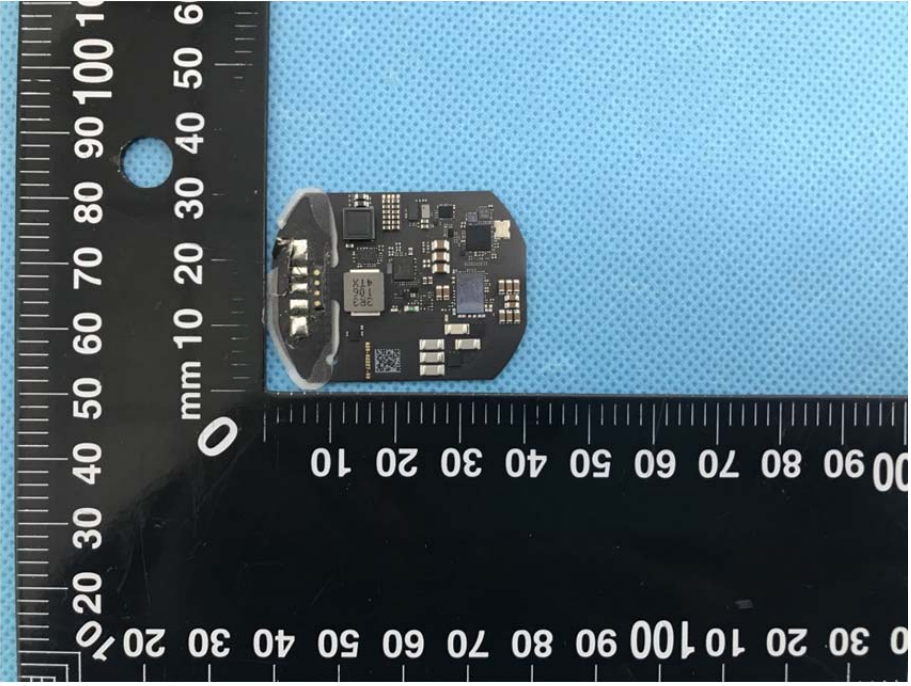

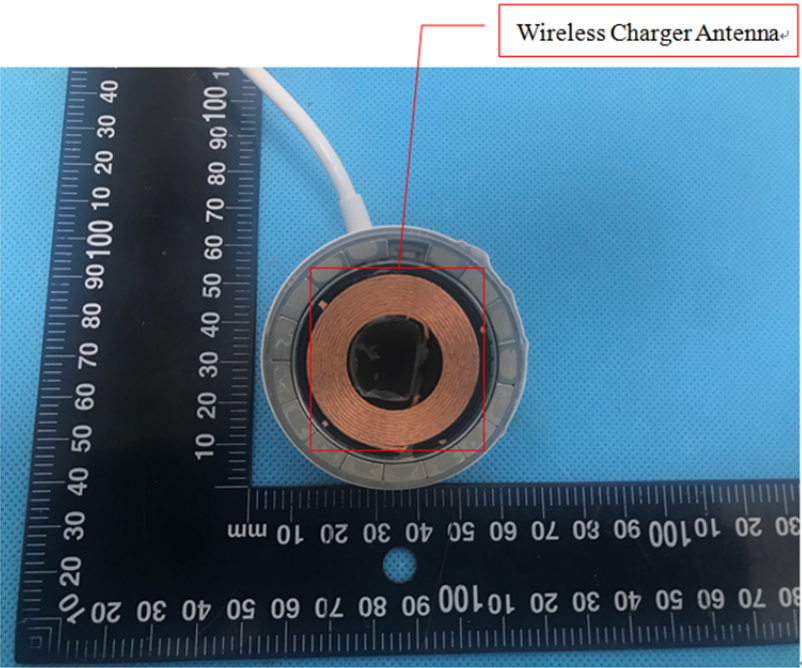

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p><b>EUT Housing and Board View 1</b></p>	 <p>A photograph showing the internal components of the EUT housing and board. The housing is white plastic and is open, revealing a small printed circuit board (PCB) with several electronic components. A white cable is connected to the board. The components are mounted on a blue textured surface. A black ruler with white markings is placed below the housing for scale, showing measurements in millimeters.</p>
<p><b>EUT Housing and Board View 2</b></p>	 <p>A photograph showing the internal components of the EUT housing and board from a different perspective. The housing is white plastic and is open, revealing a large, circular, copper-colored component, likely a transformer or inductor, mounted on a blue textured surface. A white cable is connected to the component. A black ruler with white markings is placed below the housing for scale, showing measurements in millimeters.</p>

<p style="text-align: center;"><b>Solder Board-Component View 1</b></p>	 <p>A photograph showing a circular printed circuit board (PCB) component mounted on a blue perforated metal tray. The component is a circular metal ring with a central PCB. The PCB contains several integrated circuits, including a large square chip with a QR code and a smaller chip labeled 'PHILIPS'. The component is positioned next to a black ruler with white markings, showing a diameter of approximately 80 mm. The ruler has markings from 0 to 100 mm on the left and 0 to 80 mm on the right.</p>
<p style="text-align: center;"><b>Solder Board-Component View 2</b></p>	 <p>A photograph showing a square PCB component with a gold-colored border and numerous gold-plated solder pads on its surface. The component is mounted on a blue perforated metal tray. It is positioned next to a black ruler with white markings, showing a side length of approximately 30 mm. The ruler has markings from 0 to 100 mm on the left and 0 to 80 mm on the right.</p>

<p><b>Solder Board-Component View</b> 3</p>	 <p>A photograph showing a small, circular printed circuit board (PCB) component with various electronic components and solder joints. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's diameter being approximately 30 mm.</p>
<p><b>Antenna View</b></p>	 <p>A photograph showing the underside of the component, revealing a circular copper coil antenna. A red box highlights the coil, and a red line points to a label "Wireless Charger Antenna" in a white box. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the coil's diameter being approximately 30 mm.</p>
