

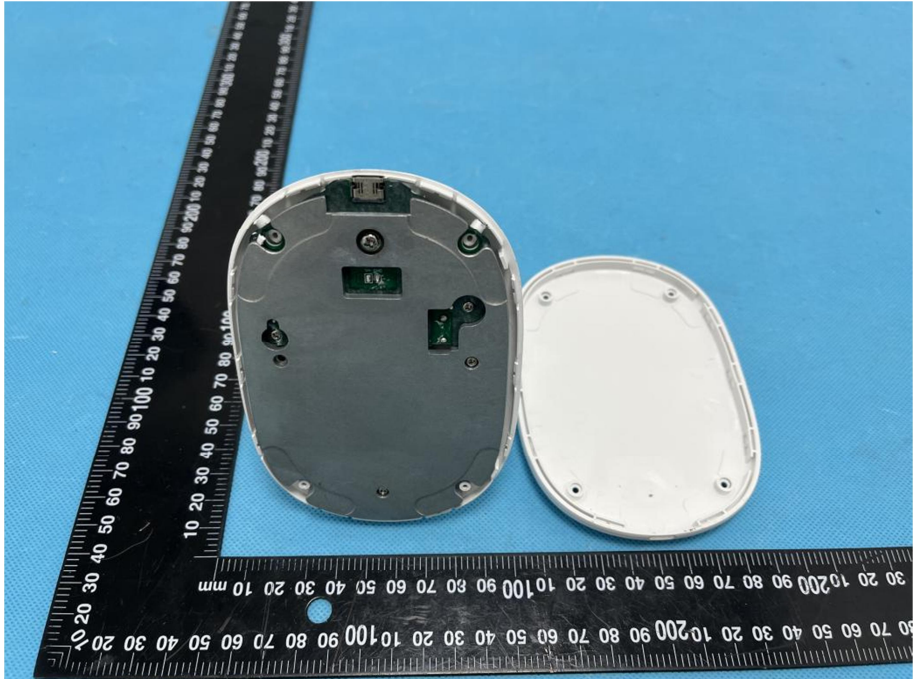

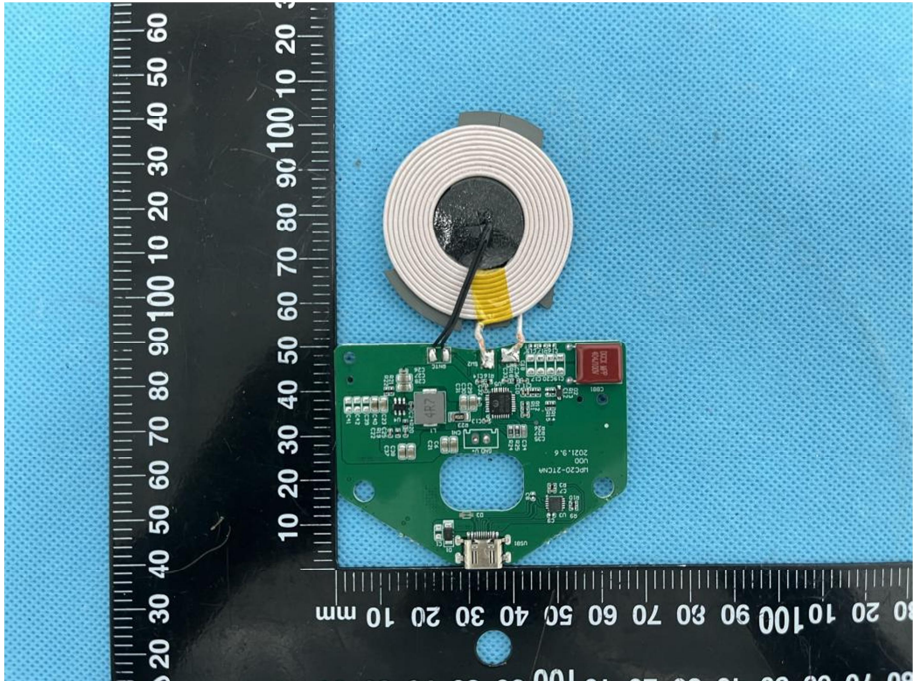

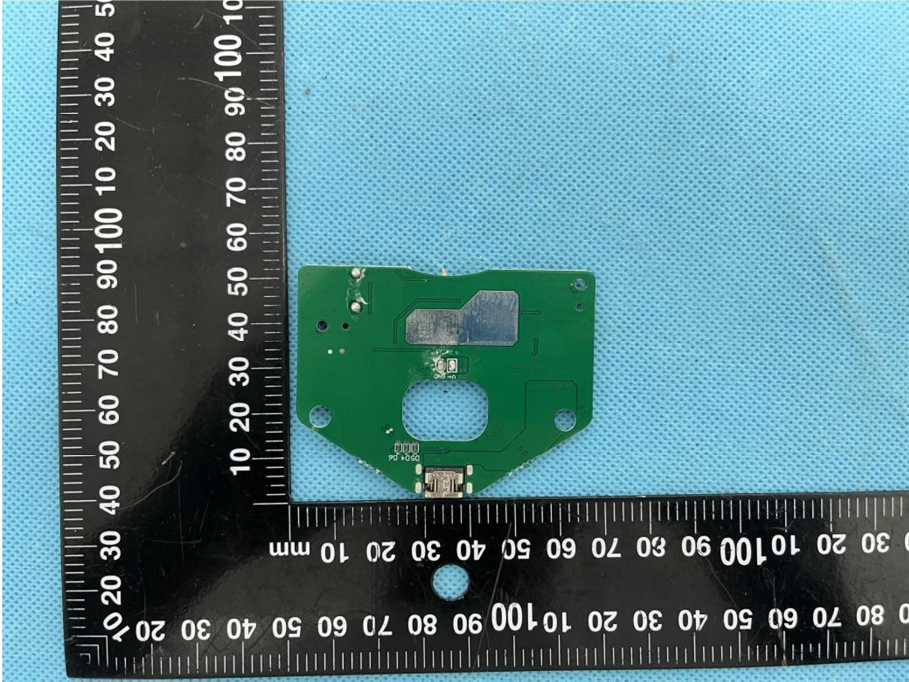

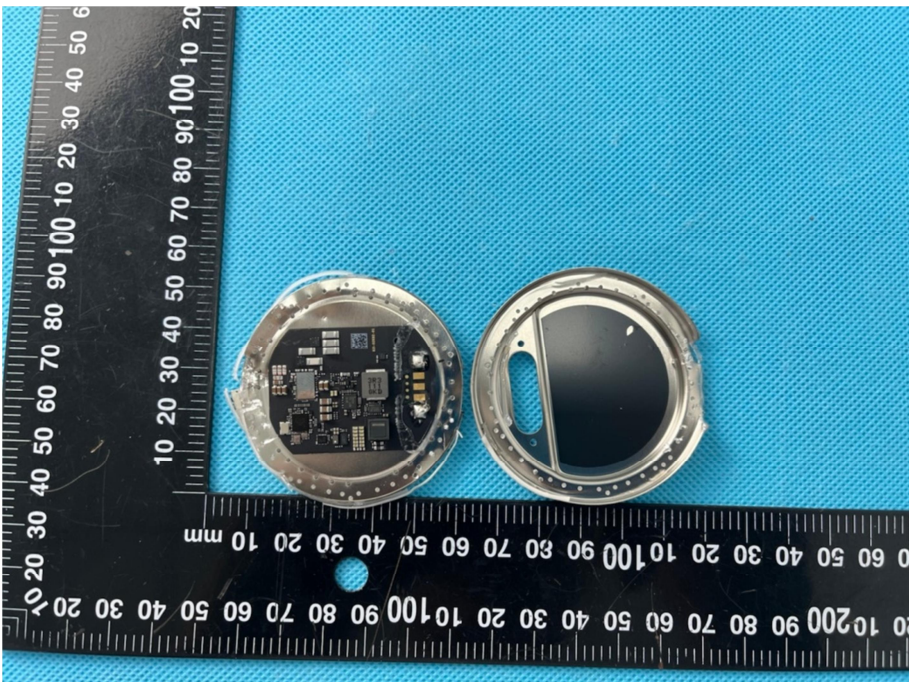

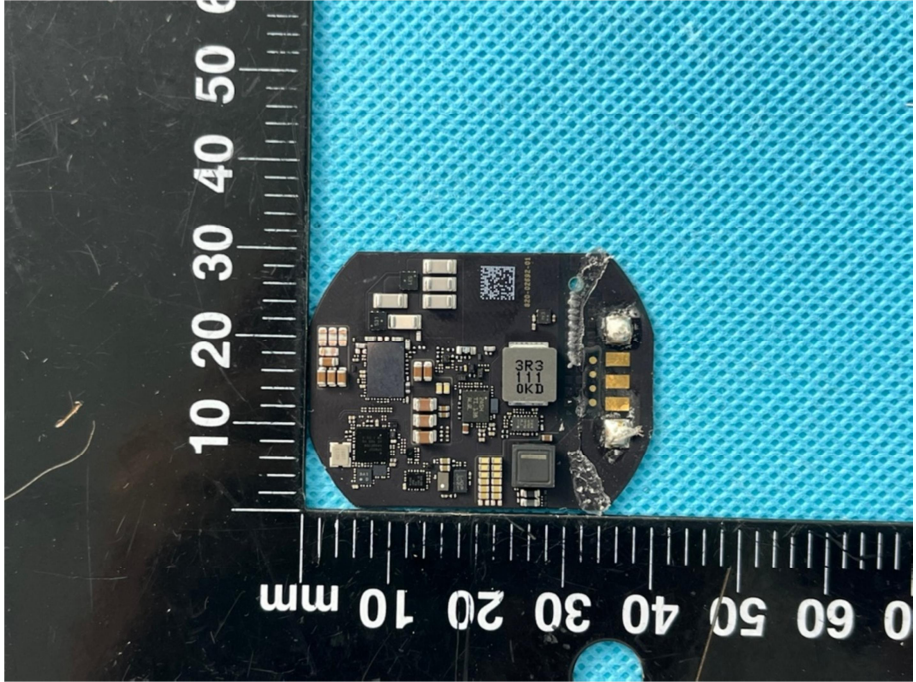

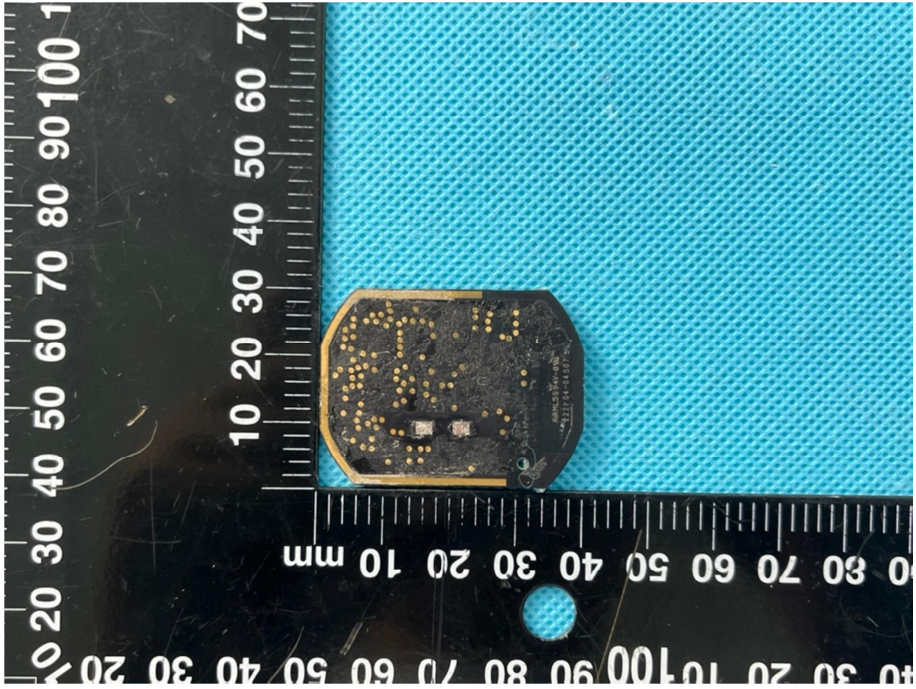

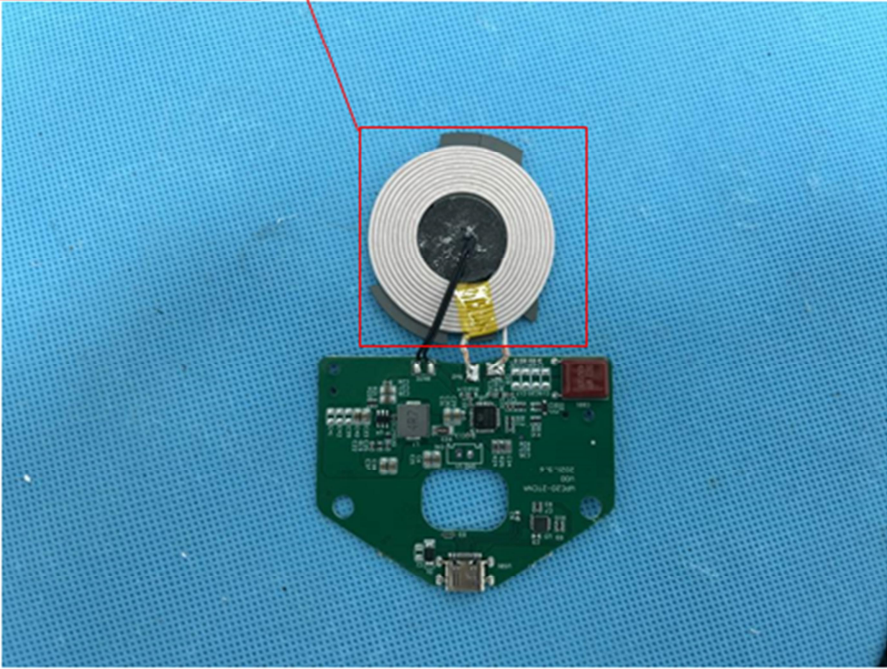

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing the disassembled EUT housing and board. The housing is split into two parts: a grey back cover and a white front cover. The internal board is visible, featuring a green PCB with various components. A black ruler is placed below the components for scale, showing measurements in millimeters.
<p>Solder Board-Component View 1</p>	 A close-up photograph of the solder board component. It shows a green PCB with various electronic components, including a red component labeled 'WALTEK'. A white ribbon cable is connected to the board. A black ruler is placed to the left and bottom for scale, showing measurements in millimeters.

<p style="text-align: center;">Solder Board-Component View 2</p>	 A photograph of a green printed circuit board (PCB) component, likely a solder mask or a small board, placed on a blue textured surface. The component is irregularly shaped with a central circular cutout and several smaller holes. A black ruler with white markings is positioned vertically to the left and horizontally below the component for scale. The ruler shows measurements in millimeters, with the horizontal ruler indicating the component is approximately 100 mm wide and 50 mm high.
<p style="text-align: center;">Solder Board-Component View 3</p>	 A photograph showing two circular metal components, possibly lens housings or camera modules, placed on a blue textured surface. The component on the left is open, revealing a complex internal circuit board with various electronic components. The component on the right is closed, showing a dark, reflective surface. A black ruler with white markings is positioned vertically to the left and horizontally below the components for scale. The ruler shows measurements in millimeters, with the horizontal ruler indicating the components are approximately 100 mm in diameter.

<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph showing the top surface of a small, dark, octagonal PCB component. The component is populated with various electronic components, including a large square chip with the marking '3R3 111 0KD', several smaller surface-mount components, and a QR code. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's width being approximately 35 mm and its height approximately 25 mm.</p>
<p style="text-align: center;">Solder Board-Component View 5</p>	 <p>A photograph showing the bottom surface of the same octagonal PCB component. The surface is populated with numerous small, circular gold-colored solder pads arranged in a grid pattern. There are also a few larger, square pads. The component is placed on the same blue textured surface next to the same black ruler. The ruler shows measurements in millimeters, with the component's width being approximately 35 mm and its height approximately 25 mm.</p>
