| <p style="text-align: center;">Solder Board-Component View 3</p> |  <p>A photograph showing a soldered component on a blue perforated board. The component consists of a circular metal base with a central hole and a copper-colored coil wound around it. The component is soldered to the board. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom.</p> |
| <p style="text-align: center;">Solder Board-Component View 4</p> |  <p>A photograph showing the same soldered component as in View 3, but from a different angle. The component is a circular metal base with a central hole and a copper-colored coil. The component is soldered to the blue perforated board. A black ruler with white markings is placed below the component for scale, showing measurements in millimeters. The ruler is oriented vertically, with the 0 mark at the top and the 100 mark at the bottom. The component is positioned such that its diameter is approximately 20 mm.</p> |
