

# Reciprocal Labs Corporation

---

Date: February 15, 2012

To Whom It May Concern:

The Reciprocal Asthmapolis Sensor Model I will be set to a power setting of 13 which corresponds to a maximum output power of -0.6dBm. The end-user does not have control over the power setting of the product and this power setting will be preset prior to the customer receiving the product. Reciprocal agrees to never change this setting without performing additional compliance testing and resubmitting the new information to the FCC.
