

Device is in portable RF exposure category

Based on Pg 83 of the test report,

| | |
|-----------------------------|----------|
| Peak conducted output power | 6.80dBm |
| Antenna gain | 4.745dBi |
| EIRP | 14.27mW |

Low threshold for SAR exemption $60/f(\text{GHz}) = 60/2.441 = 24.6\text{mW}$

Since both conducted output power and EIRP are below the low threshold for SAR exemption. Device complies with FCC RF radiation exposure limits for general population as a portable device.
