Subject: Questions Regarding FCC ID: A98-7N4S11A

To: Mr. Johnny Pham/ NEC
From: Mr. Gregory Czumak/ PCTEST TCB

RE: FCC ID: A98-7N4S11A

Applicant: NEC

Correspondence Reference Number: A9890107
Confirmation Number: 902040107-11
Date of Original Email: March 16, 2009

Subject: Request for additional information

In regards to your recent TCB application referenced above, we kindly request that you provide the following additional information.

1. The measured PCS GSM high channel conducted power level exceeds the range shown in the Technical Specifications document. Please either revise the document accordingly and resubmit it, or re-test a unit whose power falls within the specified range and submit new test data.

ANSWER: See attached.

3. Please enter the max SAR levels on the RF Warning page and resubmit it.

ANSWER: See attached.

4. Is the EUT capable of operating in voice mode in the "share style" position? If so, please provide head SAR data in this configuration.

ANSWER: No

5. FYI: the RFX body-worn statement on the RF Warning page does not actually caution the user to comply with the minimum separation distance and to avoid metallic components in body-worn accessories, it only states that compliance was demonstrated in this configuration. In future applications please revise the language accordingly. In addition, in the future, please provide a more detailed block diagram of the RFID.

ANSWER: Understood.

The item indicated above must be submitted before processing can continue on the above referenced application.

Sincerely,

Gregory Czumak
