CONFIRMATION STATEMENT

DATE : MAY 26, 2001

Federal Communications Commission
Authorization and Evaluation Division
7435 Oakland Mills Road
Columbia, MD 21046

To Whom It May Concern :

We the undersigned, here by confirm that model No. HTX-420 (FCC ID : AAO1901108) is incapable of operation (tuning), or readily being altered by the user to operate, within the frequency bands allocated to the Domestic Public Cellular Radio Telecommunications Service in part 22 of this chapter (cellular telephone bands) as below reasons.

Frequency generation is PLL type so that frequency shall be tuned / controlled by CPU. Current CPU has no capability to cover cellular frequencies. Even if CPU is changed to receive cellular frequencies, VCO cannot cover cellular frequencies. Therefore, even if a user modified or changed CPU or Filter, this unit still remains the state in which the unit cannot receive any cellular frequencies.

Sincerely Yours,

BG TECH
